†Black and color print speeds are measured in accordance with ISO/IEC 24734. Actual print times will vary based on factors including system configuration, software, and page complexity. For more information, visit www.epson.com/printspeed | **1** Compared to similarly featured conventional color laser printers priced at $499 (USD) or less and 30 ppm or less based on industry available data as of April 2022. Actual power savings will vary by product model and usage. | **2** Requires Epson Smart Panel app download. Data usage fees may apply. | **3** Most features require an Internet connection to the printer, as well as an Internet- and/or email-enabled device. For a list of Epson Connect enabled printers and compatible devices and apps, visit www.epson.com/connect | **4** Wi-Fi CERTIFIED™; level of performance subject to the range of the router being used. Wi-Fi Direct may require printer software. | **5** FPOT is measured on letter-size paper in accordance with ISO/IEC 17629. FSOT is measured on letter-size paper in accordance with ISO/IEC 24734. | **6** Monthly duty cycle is the highest duty a user could expect in a month, based on near-constant operation of a device of this kind. It is not recommended that the device be run at this duty. For best device performance, run the device at the recommended monthly page volume. | **7** Only printing is supported under Windows Server OS. | **8** Some applications and/or functions may not be supported under Mac OS X and macOS. | **9** Internet access is required to install Mac OS X and macOS drivers and software. | **10** Replacement cartridge yields are based on ISO/IEC 24711 tests in Default Mode printing. Cartridge yields vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colors are used for printing and printer maintenance, and all colors have to be installed for printing. For print quality, part of the ink from the included cartridges is used for printer startup and a variable amount of ink remains in the cartridges after the "replace cartridge" signal.
