New Dial Colours Added to the Popular Semi Skeleton in the Contemporary Collection

Orient has added four new models to its Semi Skeleton series, Orient's iconic model from the Contemporary Collection. Popular colours around the world such as white, red, green and light blue have been incorporated into the dial, providing even more options to choose from.

ORIENT

The Semi Skeleton features a unique dial with a semi-skeleton window at 9 o'clock overlapping with the small second circle at 6 o'clock, and an edgy case that exudes a strong presence. Its contemporary style has made the Semi Skeleton one of the most-loved models worldwide.

The new dial colours lend a casual feel to the watch collection, making them especially appealing to a younger audience. A standout in the new line-up is the model with a gold-coloured case and bracelet, a first for the Semi Skeleton. It is complemented with a white dial, gold-coloured hands and applied indices, creating a unique look that combines warmth and luxury.

Clever colour combinations also appear on the vivid red, green and light blue dials. The red and light blue dials are coupled with silver-coloured hands and applied indices, while the green dial comes with gold-coloured hands and applied indices. The exquisite harmony and contrast of colours make the Semi Skeleton all the more appealing.

The see-through caseback reveals the automatic (with hand winding) mechanical in-house calibre F6S22 known for providing steady accuracy of +25 seconds to -15 seconds per day and a power reserve of 40 hours. This is a practical mechanical watch that is ideal for daily use.
