ORIENT adds new diver design model with offset crown to popular Sports Collection

ORIENT will release four new models of its popular diver design watch*, with the screw-down crown at the 4 o'clock position. The collection also comes with a limited edition commemorative model to celebrate ORIENT's 70th anniversary. Along with the precision and reliability of the in-house movement for which these watches are known, the new models feature colorful styling that stands out both by the ocean or in the city.

*Not an ISO standard diver's watch.

ORIENT's iconic diver design models boast more than fifty years of history since their introduction in 1964. The new diver design watches embody the best of ORIENT's functional features, such as a 43.4mm diameter case and sapphire crystal. The screw-down crown is positioned at 4 o'clock to accommodate the large case designed for comfort, wearability, and easier operation on the wrist.

With water resistance of 20 bar, the new diver design models are ideal for water sports, snorkeling or skin-diving. ORIENT is well known and appreciated for its use of vibrant colours and the new additions do not disappoint. These models are available in black, green, and blue all with sunburst patterns, and with matte green dials. A gold gradation dial makes up the 70th anniversary limited edition model of just 2,500 pieces. The gold gradation design of the dial creates a vintage feel reminiscent of the Jaguar Focus model, launched by ORIENT in the 1970s, which went on to become one of the brand's most popular timepieces. Another striking feature is the bezel, showing a playful touch of dual color combinations such as blue and red, or green and orange. Each model has high legibility even in the dark thanks to high-intensity Luminous Light accenting the hands and applied indices.

The first bronze colored case in a diver design model (RA-AC0K04E and RA-AC0K05G), combined with a nylon or leather pull-through strap (for the 70th anniversary commemorative limited edition), further boosts its contemporary styling, making it an ideal accessory for those who want to enjoy a new take on a traditional diver's watch.
