<b>Maintenance Box</b>	T295000

<sup>1</sup> Replacement ink yields for ink cartridges are based on ISO/IEC 24711 and methodology and ISO/IEC 24712 patterns in default mode printing continuously. Replacement ink yields for ink packs and bottles are based on Epson methodology and ISO/IEC 24712 patterns in default mode printing continuously. Cartridge, ink pack and bottle yields vary considerably for reasons including images printed, print settings, temperature, and humidity. Yields may be lower when printing infrequently or predominantly in one ink colour. All ink colours are used for printing and printer maintenance, and all colours have to be installed for printing. For print quality, part of the ink from the included cartridges, ink packs and bottles is used for printer startup and a variable amount of ink remains in the cartridges, ink packs or bottles after the "replace cartridge", "replace ink pack" or "refill ink tank" signal. For details, see [www.epson.ca/cartridgeinfo](http://www.epson.ca/cartridgeinfo).

<sup>2</sup> Black and colour print speeds are measured in accordance with ISO/IEC 24734. Actual print times will vary based on system configuration, software, and page complexity. For more information, visit [www.epson.ca/printspeed](http://www.epson.ca/printspeed).

<sup>3</sup> Maximum monthly duty cycle is the highest duty a user could expect in a month, based on near-constant operation of a device of this kind. It is not recommended that the device be run at this duty. For best device performance run the device at the recommended duty.
