

Epson Print Admin

Server-based print management solution

Improve control of your devices by increasing security and reducing costs.

Epson Print Admin is a server-based print management solution designed for Epson devices, making it an ideal tool for small to medium-sized corporate teams.

It includes user management features through authentication and printing rules. Additionally, it allows you to control each device with detailed reports for tracking trends.

Its main benefit is providing comprehensive management of Epson WorkForce* models, thanks to features like device access control, work optimization (including cost-saving printing policies), and detailed reports on the usage of each device.

Reduce your printing costs: by implementing control over print jobs in your organization with customized policies, rules, and detailed reports.

Information and device security: User authentication prevents unauthorized access to devices, ensuring secure printing and scanning environments.

Accelerate business processes: by using integrated scanning to route documents to folders, email, and servers via the network.

Be a professional host: Provide guests with secure, hassle-free access to your printing and scanning equipment.

Promueva iniciativas sustentables: trabaje en su empresa con equipos que impactan positivamente en el medio ambiente.
