

# 2021 ENVIRONMENTAL SUSTAINABILITY REPORT

Reporting Period: April 2020 - March 2021

# **Epson Portland Operations**

# **EPSON AND THE ENVIRONMENT**

# Life Cycle Thinking

Through Epson's creation of eco-considerate products, we are cooperating with customers and business partners to expand our environmental impact mitigation efforts beyond our doors.

#### Think

 Design products for their entire life cycle

#### Choose

 Use environmentally conscious materials

#### Create

Use

· Produce with a minimum of materials and energy, prevent unnecessary emissions

· Eco-performance as a customer value

#### Deliver

 Transport products efficiently

#### Recycle and Reuse

• Reuse resources

# **ENVIRONMENTAL VALUES**

As Epson's United States manufacturing affiliate, we are proud to have a progressive environmental program that includes a zero waste to landfill operation, renewable energy purchase program, effective use of energy and resources, responsible supply chain management, and employee engagement programs.

Environmentally Sustainable **Processes** 

Prevention

**Pollution** 

Support Environmental Conservation

**Employee Participation** 

Fulfil Compliance **Obligations** 

Communication

To support our goals and to ensuring compliance, we have company policies and a Corporate Social Responsibility (CSR) Action Plan that serve as a benchmark to gauge current activities, future activities, and help score our progress on a quarterly basis. Our environmental values are used as a framework to measure and monitor environmental activities and determine company environmental objectives in conjunction with our Environmental Management System (EMS).

# SUSTAINABLE PROCESSES

We integrate our Environmental Management System (EMS) into business processes to produce environmentally sustainable products.

## **ENVIRONMENTAL INDICATORS**

Accomplishments and Deficiencies Exceeding Regulatory Compliance

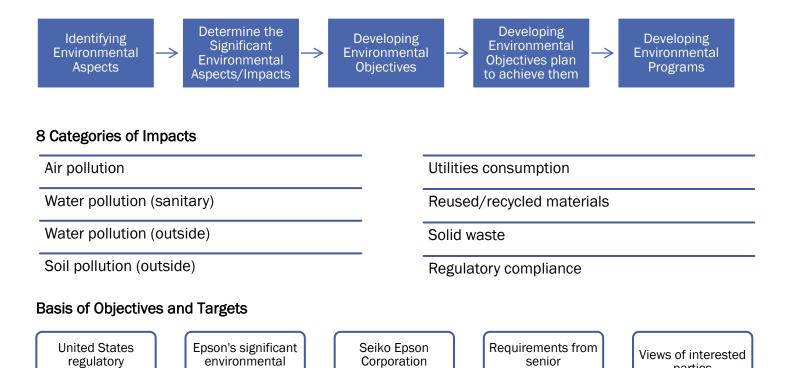

Green Purchasing	Target: 80% of consumable supplies purchased are environmentally preferred products	Result: Achieved 85% green purchasing for consumables
Solid Waste	<b>Target:</b> (Hillsboro) Maintain Zero Waste-to-Landfill	Result: 100% solid waste goes to a waste-to-energy facility
	<b>Target:</b> (Hillsboro) Maintain FY20 Baseline Solid Waste Level	Result: 1% decrease
	Target: (QCU) Maintain FY20 Baseline Solid Waste Levels	Result: 10% decrease
Total CO <sub>2</sub>	Target: (Hillsboro) Maintain FY20 CO <sub>2</sub> Emissions (per unit produced & gas vs. baseline FY20)	Results: Achieved 8% CO2 reduction
	<b>Target:</b> (QCU) Maintain FY20 CO2 Emissions (Based on Production Demand)	

# STRATEGIC APPROACH

# **Determining Performance Indicators**

The EMS is intended to be a guide for establishing, maintaining, and improving our environmental activities. The Environmental, Health, and Safety (EHS) department drafts recommendations based on the requirements and categories listed below which are approved by senior management. Once approved, the EHS department drafts plans for each objective, detailing who is responsible and critical milestones or deadlines to achieve each target. The EHS committee then completes an annual analysis of those environmental aspects and impacts.

#### **Environmental Planning Procedures Integrated Process**

parties

management

# POLLUTION PREVENTION

requirements

# **Energy Conservation & Renewable Energy**

impacts

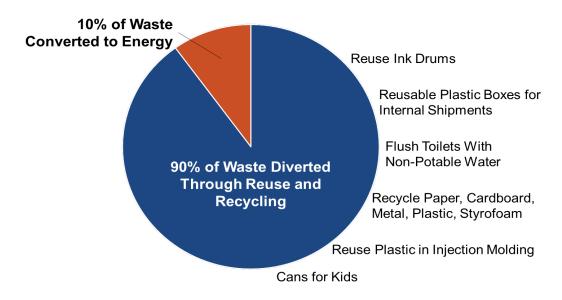

At Epson's Portland Operations, we take a multifaceted approach to energy conservation which included upgrading the Hillsboro site's HVAC System with approximately 48% energy reduction and control electric power maximum demand reduction of operation lead-time for Quartz products at the Longview site. The company uses energy-efficient lighting which includes the use of LED lightbulbs in most of our facility and motion-sensing light switches as part of our ongoing efforts to conserve energy.

# Commitment to Zero Waste to Landfill

Twenty years ago, EPI began working with Covanta, a world leader in providing sustainable waste and energy solutions, to process all waste that EPI could not reuse or recycle. Covanta's waste-to-energy facility in Brooks, Oregon, collects EPI's solid waste for combustion. Once the waste is burned, water is superheated and the steam turns a turbine generator to produce electricity, which is exported to local utilities. After combustion, the volume of waste is reduced by 90% and metals are extracted for recycling. The waste stream at EPI's Hillsboro Operations employs comprehensive reuse and recycling programs,

which collectively divert an average of 90% of solid waste from incineration. By sending the remaining 10% of waste to the waste-to-energy facility, we continue to limit EPI's overall environmental impact

Through this program, we have recycled or otherwise diverted 166 tons of materials from the landfill in FY21.

# **Renewable Energy**

The Hillsboro site has been purchasing renewable energy through Portland General Electric's (PGE) Clean Wind<sup>SM</sup> Program since 2003. In FY21, we purchased 4,752,800 kWh of renewable power and avoided 7,425,774 lbs. of CO<sub>2</sub> emissions equivalent to not driving a car for 8,465,774 miles. The company's decision to use electricity from wind-generation facilities benefits everyone by increasing the demand for power from renewable sources.

# **Environmental Conservation**

To reduce and offset CO<sub>2</sub> pollution, Epson's Portland Operations are VOC-free (and have been since 2002). In addition, the company provides TriMet annual passes for public transportation to all Portland metro area employees as part of our comprehensive benefits package through the Department of Environmental Quality's (DEQ's) Employee Commute Options (ECO) program. This pass encourages ridership on environmentally friendly forms of transportation to reduce air pollution from motor vehicles and reduce local traffic congestion. Additionally, employees are encouraged to carpool or ride their bikes to work.

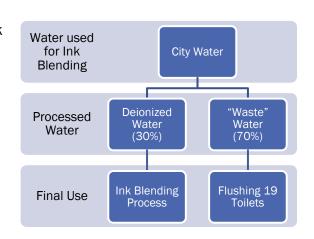

# **Community Support**

Each year, EPI makes donations to a variety of local, nonprofit organizations with focuses on the environment, STEM education (science, technology, engineering, and math), social welfare, culture, and the arts. In addition to the company's monetary donations, we also create opportunities for everyone to get involved through giving campaigns and volunteer opportunities.

Collectively, these activities make up EPI's Corporate Social Responsibility (CSR) initiatives. We put an emphasis on these activities during October's Community Support Month, which includes our annual United Way campaign, blood drive, tree planting volunteer day, and more.

# **Water Efficiency**

At the Hillsboro site, we capture non-potable water from our ink blending process and use it as flush water for the 19 toilets in one building. Through this process, we roughly reuse 900 gallons of water per day. The company also has low-flow toilets and maintains an extremely conservative summer landscape irrigation program made possible by a switch to native vegetation instead of high-water-needs-plants and flowers.

# **EMPLOYEE PARTICIPATION**

We believe in environmental conservation at the individual level, so we provide a variety of opportunities to employees and community members. Additionally, Epson's Portland Operations also make monetary donations to local non-profit organizations with an environmental focus. The local organizations we support include Columbia Land Trust, Lower Columbia Estuary Partnership, Jackson Bottom Wetlands, and Friends of Trees.

# **Environmental E-Kaizens**

We encourage employee involvement and promote continual improvement through the E-Kaizen Continual Improvement Program ("E-Kaizen"). Once an environmental improvement is implemented, an E-Kaizen may be submitted through the online E-Kaizen system. There was a total of 53 environmental e-kaizens that were implemented. By implementing these improvements, we were able to save our company an average of \$13,758 per month.

# **FULFIL COMPLIANCE OBLIGATIONS**

# **Regulatory Status Category**

Conditionally Exempt Small Quantity Generator

# **Regulatory Reports**

- DEQ NPDES Cooling Tower Report
- Department of Ecology Annual Storm Water Discharge Report
- DEQ Recovered Materials Report
- State Fire Marshal Report
- SWIS Metro Report
- EPA TRI Report
- EPA TSCA Report
- Waste Water Discharge Report

#### **Site Permits and Licenses**

- Department of Emissions Quality NPDES Waste Discharge (100-J Permit)
- Conditional No Exposure Exemption (Longview CNE #CNE303287)
- State Waste Discharge (Longview Permit #ST6185)
- Clean Water Services Industrial Wastewater Discharge (Permit #133072)
- Department of Emissions Quality NPDES Storm Water Discharge (Permit #NEC211)
- Cooling tower (100-J Permit)

# **Sustainable Purchasing**

Epson Portland Operations maintains a strong green purchasing program, maintained through vendor surveys and audits to verify that products and methods of production are environmentally friendly.

## About ISO 14001

The ISO 14001 standard sets criteria and provides a framework for an Environmental Management System (EMS) that can be adopted by any organization. By using ISO 14001, Epson's Portland Operations demonstrates a commitment to measuring and improving our environmental impact.

This site established its
EMS in 1998 in accordance
with the requirements of
ISO 14001 and was the fifth
company in Oregon at the
time to achieve such status.

The company participates in regular internal audits and annual external audits and has maintained its certification without interruption since 1998.

# COMMUNICATIONS

We are proud of our sustainable business practices and make every effort to communicate them, as appropriate, through: Internal Communications, Public Outreach, Community Engagement, and this Annual Environmental Sustainability Report.

### **Green Business Leader**

Epson's Portland Operations maintains the Washington County Green Business Leaders Gold Award, an award designed to recognize an organization's efforts in sustainable materials management, toxins reduction, employee, and community engagement, and supporting actions like conserving water and energy.

# **Independent Auditor's Report**

Epson Portland Operation's Environmental Management System (EMS) 14001:2015 audit was conducted in the end of November through the beginning of December 2021 by Bureau Veritas Certification. There were no major Non-Conformances found during the audit. Based on the evidence verified and the findings of the audit, the EMS is maintained and is in conformance with the requirements of the ISO 14001:2015.

The Management System Review consists of an annual executive management strategic review by senior management, an annual review by the EHS committee as well as a monthly overview by leadership at and above the Assistant Manager level. All reviews were completed in FY2021. In addition, Epson conducts monthly focus audits to ensure the adequacy of policies, procedures, and actions that support cleanliness, safety, and the environmental considerations at the plant. These audits are done by members of the EHS committee as well as management representatives. Twice a year, the subject matter of the audits is environmental, and each time, any concerns noted are communicated to the appropriate person and action is taken to make corrections.

# **ABOUT EPSON'S PORTLAND OPERATIONS**

Based in Hillsboro, Ore., with a satellite office in Longview, Wash., Epson's Portland Operations are the United States manufacturing subsidiary and logistics center for the Epson brand. We move ink cartridges from concept to completion using Epson robotics, including precision injection molding of proprietary plastic parts and manufacture of Genuine Epson Ink. Our finished cartridges are packed into retail boxes onsite and prepared for distribution.

At our Longview, Wash., location, we manufacture synthetic quartz crystals for Epson's Micro-Device Division. The quartz is used in electronic products manufactured by Epson affiliates around the world.

Led by the Japan-based Seiko Epson Corporation, the worldwide Epson Group generates annual sales of more than JPY 1 trillion. Learn more at <u>global.epson.com</u>, <u>epson.com</u>, and <u>epson.com</u>/Portland.
