Epson Print Admin Serverless

Print Management Solution
| Digitalization | serverless

Increases the security and productivity of Epson devices without a management server.

Epson Print Admin Serverless is a complete print management solution. When connected to compatible Epson printers or scanners, it enables features that streamline print management and the routing of scanned documents—all without the need for an external server.

It has basic resources for user authentication, security and device management, and automated reporting.

The Serverless version of Epson Print Admin offers user authentication features, allowing you to control access to compatible Epson printers and scanners. This enhances both the security and efficiency of your company's document processing.

Control your serverless printing costs: with an integrated solution that requires no additional hardware installation or services.

Protect information with built-in security: Print jobs are securely held on the device until the user authenticates to release them. This eliminates the risk of sensitive information being left on the printer and safeguards against unauthorized use, creating a secure environment for printing, scanning, and copying.

Improve user productivity: With built-in network scanning, route documents to folders (Scan to My Folder), email (Scan to My Email) and servers.

Controlled access: Device features can be customized for quick access to predefined functions, such as black-and-white copying or scanning, without the need for authentication. This allows administrators to tailor the solution to meet their specific needs.

Easy monitoring with Epson Device Admin: Track printed, copied, scanned, and faxed page counts through a free app.

General Features

Authentication
ID card authentication
LDAP User Login
Local User Login
PIN code (4 to 8 digits))

User Management
Manage User List
Create User Account Using LDAP Sync
Create User Account Using CSV File Import
Create user account manually
Add/Remove User Account
Export User Account

Printing Jobs
Set maximum time limit for unreleased jobs
(up to 720 hours)
Allow Job Retention for Reprint
Delete print jobs

Scanning
Scan to my email
Scan to Email
Scan to my folder
Scan to Network/FTP Folder

Device Management
Manage device settings
Edit device users
Set Job History Retention Time Limit
