Orient Star Adds New Light Colours Reminiscent of Seaside to the Layered Skeleton

Orient Star has added two new models to the Contemporary Collection's Layered Skeleton series: a regular model with a champagne gold-coloured dial evoking the seaside, and a limited-edition mint green model with a limited release of 700 pieces. The sophisticated design makes this the ideal watch to pair with summer outfits.

Layered Skeleton takes its inspiration from business suits and features an original dial composed of two layers. The semi-skeleton opening on the dial is paisley shaped, and the open-work design of the power reserve display also reveals the inner workings of the mechanical movement, giving the watch dial an eye-catching look.

The latest model in the series uses refreshing colours while adding a carefree Mediterranean atmosphere to the dials to express the ambience and sophistication of the coast. The beautiful tonal gradation of the dial's two layers and enhanced sense of depth pairs beautifully with the refined, casual grace of Mediterranean style.

The new regular Layered Skeleton model gives an elegant impression by combining a champagne gold-coloured dial evoking rays of coastal sunshine with a grey calf leather strap. Meanwhile, the limited-edition model of 700 pieces feels active and youthful with its mint green dial reminiscent of a fresh breeze over the blue ocean, and a stainless steel (SUS316L) metal bracelet with five-piece links arranged in short pitches.

The mechanical automatic in-house calibre F6F44 movement offers a 50-hour power reserve and stable high accuracy of +25 seconds to -15 seconds per day. The new dial colours add a stylish flair to the Layered Skeleton's highly sophisticated timekeeping mechanism complete with Orient Star's power reserve indicator. The limited release mint green model is engraved with a limited-edition serial number on the see-through case back, enhancing the special feel of the watch.

About Orient Star

Capture your gaze. Reflecting the wonderous beauty of shining stars. Orient Star are superb timepieces, crafted by Japanese artisans since 1951. Orient Star continues to shine and innovate its technology as well as the design of its beautiful timepieces. Traditional skills to achieve intricate craftsmanship, in-house production system to create high-quality mechanical movements, and original designs, are all incorporated for these unique, made-in-Japan watches. Orient Star will continue to deliver these creations in Japan and throughout the world.

A Short History

- 1951 Orient Star is created.
- 1957 Orient Star Dynamic* is launched with hour, minute, and second hands on the central axis of the watch.
- 1971 The 46 series movement is created, combining both practicality and high accuracy. This formed the base movement of the Orient Star and Orient brand for 50 years.
- 1991 Mon Bijou* is launched, a skeleton model of high-quality and aesthetic appeal.
- 1996 The power reserve indicator, now an iconic feature of the brand, is integrated into the design.
- 2017 Orient Watch Co. Ltd. merges with [Seiko Epson Corporation](#), a company with a strong watchmaking heritage and focus on precision engineering. Both organisations share a vision for innovation and high-quality design and craftsmanship creating a strong foundation for the future growth of Orient Star.
- 2017 The Mechanical Moon Phase, a cosmic timekeeper is launched as a symbol of this new collaboration. This marks a new era of watchmaking for Orient Star brand.
- 2021 Orient Star celebrates its 70th anniversary. The Skeleton models are mounted with the latest movement with in-house developed silicon escape wheel for longer power reserve and beauty, incorporating design inspired by the vast universe.
