Smart Functionality

Auto Platen Gap Adjustment

The automated moving platen and roller-equipped printhead enable the PLQ-35/50 to accept a variety of media thickness.

Auto Sheet Alignment

Photo sensors detect and automatically instruct the paper feed roller to realign any misfed documents.

Auto Border Function

A paper width detector intelligently enables printing at the same distance from the paper edge wherever the paper is set within the paper tray. Paper widths are also automatically detected to ensure printing at the proper position on the fed material.
