Outstanding Print Quality and Performance

Achieving the finest details both on paper and special media, the UltraChrome XD3 inks with new red ink produces prints in rich and vivid colours, especially for POP materials. Featuring six colours, including the all-new gamut-expanding red ink, businesses can print everything from everyday technical drawings to graphics and renderings. Water-, smudge- and fade-resistant, this cutting-edge pigment ink produces durable, vibrant, and long-lasting prints.

Improved Performance with Adobe PostScript

Delivering prints with improved accuracy for transparent and overprint layers, as well as faster processing time for PDF and PS output. This includes additional support for printing of EPS, PDF, PS, TIFF, JPEG and Cals-G4 data.

Improved Media Handling

With dual-roll capability, the operator's workload is reduced and productivity is maximised. Using the function for automatic selection of different media types and sizes, the second reel can be used as a take-up reel for unattended non-stop operation. The sensor detection also allows easy loading and unloading of media for a fuss-free operation.

Software Solutions

Print Management

Epson Print Admin* is a centralised print management solution that creates a secure printing and scanning environment through user authentication. Improve convenience with document distribution and pull printing, set rules and quota for better cost savings. A serverless version is available for organisations that require simple print management.

*Epson Print Admin requires a Windows Server.
Epson Print Admin Serverless requires SSD Option.

Document Capture Pro

Simplify your scanning workflow and automate your scanning tasks at the touch of a button with up to 30 customisable job settings and send documents to popular cloud storage services for collaboration.

Document Capture Pro Server

Centralise your scanning tasks and manage your fleet of up to 1,000 scanning devices with a web browser without the need to install drivers on each computer. Locate documents easily and improve document security with index logs.

Fleet Management and Production Monitor

With the Epson Device Admin, operators can easily deploy and monitor the status of a fleet of mixed Epson devices. The IT admin can automatically update, troubleshoot, provide timely support, and also generate reports for accountability and cost savings. Operators can also monitor the live production status of equipment with Epson Cloud Solution PORT. Improve efficiency, optimise printing workflow, and reduce downtime by receiving accurate support from Epson conveniently with remote troubleshooting.

Epson Edge Print Pro

An easy to use RIP software by Epson to provide the best print quality by maximising the printer's capability with advanced imaging processing technologies. High print performance and accuracy with Adobe PS engine to process PostScript data, the software is able to handle job and colour management for improved efficiency and colour accuracy.

Epson Smart Panel

Simplify the set up, monitor and control of your multi-function devices with Epson Smart Panel mobile app. Print and Scan directly from your mobile devices and integrate with cloud solutions for easy collaboration.
