Efficient and eco-conscious without compromise

EcoTank printers make the sustainable choice a simple one. They bring together eco-conscious technology with efficient features to help you be more sustainable and productive.

Be Cool and enjoy the benefits

Did you know that Epson EcoTank printers are powered by Epson's Heat-Free Technology, which helps contribute to lower annual energy bills, especially for companies operating high volume of printers. They are also more environmentally friendly. As a result, they produce up to 85% less carbon dioxide¹ and consume up to 85% less power than laser printers².

1 Annual CO2 output calculations were based on JEMAI-LCA Pro. Cedar tree CO2 absorption calculations were based on Japan Forestry Agency standards of 8.8kg CO2 per annum per tree.
2 Statistics above are based on results from internal testing conducted by Epson, using Epson L6550 ISO Color 12ipm vs Laser model ISO Color 22ppm test for power consumed to print 20 pages.
Testing single page A4 document of ISO Office Final PDF (ISO/IEC 24734). Each test was conducted twice by Epson to ensure consistency of results. Both printers have been tested under same conditions.

Save time with consistent high-speed printing

With no need for the printer to warm up, prints can start immediately. Then, once you've started, you get consistently fast printing, even for high print-density jobs.

Save energy and reduce your bills

With no fuser unit to heat, EcoTank printers consume less power than laser printers, keeping your energy bills under control.

Fewer replacement parts, lower environmental impact

Reducing waste is a critical part of being more sustainable. Thanks to our Heat-Free Technology and printhead design, our inkjet printers require significantly fewer replacement parts than laser printers, helping to reduce your environmental impact.

No compromise on productivity

Fewer replacement parts also means improved reliability, less intervention and minimal downtime, meaning your business can keep moving with confidence.

How Heat-Free Technology works

Epson Heat-Free Technology does not require heat in the ink ejection process. Instead pressure is applied to the Piezo element, which flexes backwards and forwards firing the ink from the printhead. This means printer parts last longer and energy consumption is reduced, saving energy, time and money in the process.

Laser printer

Typically this is a complex process and requires preheating the fuser, and heat again to fuse the toner to the paper.

EcoTank

Only 3 stages are needed to achieve a printout.

*Print Permanence in testing. WIR lightfastness ratings are based on accelerated testing of prints on specified media, displayed indoors, under glass. Actual stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee longevity of prints. For maximum print life, display all prints under glass or UV-absorbing acrylic and protect them from prolonged high-humidity environments. Visit www.wilhelm-research.com for the latest information.

Pigment inks suitable for business printing

Epson's Business Inkjet Printers use water-based pigment inks that are designed to offer high image quality, ease of storage and clear colour printing.

With superior water and highlighter resistance, they are ideal for colour printing in a wide range of uses such as business documents, direct mailers, and simple flyers.

Our pigment inks are highly water resistant and do not dissolve in water, making them much less susceptible to bleeding, in addition to being fade and smudge resistant.

Dye ink

Pigment ink

Full flexibility for media

With no contact or heat in the printing process, Epson's inkjet technology supports a wide range of paper types.

By ejecting ink directly onto the paper, it's compatible with media such as heat-sensitive paper, thick paper, and special paper with an uneven surface.

With a wider choice of media than laser machines, you can create polished presentations, including collateral such as printed banners, envelopes with windows, and more.
