

Epson iProjection™ Wireless Display Solution

Epson iProjection is the wireless display solution for today's BYOD classrooms, boardrooms and workspaces. With true multi-platform support, users can wirelessly display content from Chromebook™, PC, macOS®, iOS® and Android™ devices¹.

Plus, with the built-in Moderator function², available for mobile devices and computers, up to 50 users can connect to the display simultaneously, sharing content from as many as four at a time. It's the perfect tool for displaying a variety of content — or for comparing work side by side.

Display and Annotate¹

- Browser content
- Documents
- PDFs
- Photos ... and more

Advanced Functionality (Available with select projectors)

- Two-way content sharing — push content from the projector to connected devices
- Real-time mobile camera display — use your device's camera like a document camera or Web cam

Device Management²

- Wirelessly connect and manage up to 50 devices simultaneously
- Display content from up to four devices at a time on the screen

Full Chromebook Support²

- Screen mirroring capabilities
- Display content from Google Docs™, Google Slides™ and Google Sheets™
- Display Web content from a Chrome™ browser

Epson is a leading provider of innovative technology solutions that help businesses succeed. We partner with you to best meet your specific needs, focusing on:

- Improved productivity
- World-class customer service and support
- Cost-effective, high-quality solutions
- A commitment to the environment

Discover how Epson can help you work toward the future. www.epson.com/forbusiness

1 For wireless functionality, including via the Epson iProjection App, the projector must be configured on a network, either through the Ethernet port on the projector (check model specifications for availability) or via a wireless connection. Check your owner's manual to determine if a wireless LAN module must be purchased separately to enable a wireless connection. Not all Epson projectors are able to be networked. The Epson iProjection App does not support all files and formats. See www.epson.com for details. | **2** Moderator control, connecting via QR code and projector remote are not available on Epson iProjection for Chromebooks.
