ORIENT adds three new flight style models with chronograph functions to its Sports Collection

ORIENT announces three flight style analogue quartz timepieces with chronograph function to its Sports Collection. While the earlier flight style mechanical models featured three hands and date display, and a large 42.4 mm case, the new models have chronograph functions shown on the sub dials at 6 and 9 o'clock for increased legibility. Incorporating a vintage feel, the new line-up comes in a green or black dial with a nylon strap, and a beige dial option with a smooth brown leather strap. These flight style chronograph models exude practicality and clarity with aviation design accents.
