

Why Epson Robots?

As precision automation specialists, the Epson® Robots team has been building automation products for nearly four decades. An industry leader in small-parts-assembly applications, we've introduced many firsts. As a result, our innovative products are hard at work in thousands of manufacturing facilities throughout the world.

1 Leading Epson technology

- Epson is the #1 SCARA robot manufacturer in the world
- We introduced the world's first folding-arm 6-Axis robot
- Specialized integrated motion sensors help reduce vibration and increase performance

2 What you need, when you need it

- The Epson lineup features 6-Axis and SCARA robots with payloads up to 20 kg and a reach ranging from 175 to 1,480 mm
- We offer a wide range of fully integrated options including vision guidance, conveyor tracking, flexible parts feeding, force guidance and more

3 Intuitive programming software

- Epson RC+® software is extremely user-friendly, making automation setup fast and easy
- It includes time-saving features such as wizards, templates, smart tools and more

4 Reliability you can count on

- Dedicated to helping you find the best solution for your automation needs
- Epson robots are long-lasting and require little maintenance
- Over 100,000 robots sold worldwide

Meet Epson's Lineup of Award-winning SCARA and 6-Axis Robots

T-Series

Automate your factory without wasting time or money on complex slide-based solutions. These innovative All-in-One robots are available at an ultra low cost and offer fast, easy integration, taking less time to install than most automation solutions. With reach distances of 400 and 600 mm, they can handle payloads of 3 kg and 6 kg.

RS-Series

These zero-footprint robots are some of the most unique and flexible SCARA robots available in the market today. With reach distances of 350 and 550 mm, and payloads of 3 kg and 4 kg, they offer cycle times starting at 0.34 sec.

LSB-Series

The perfect solution for factories looking for maximum value without sacrificing performance, the LSB-Series offers fast, compact performers at a low cost. With reach distances ranging from 400 to 1,000 mm, and payloads from 3 kg to 20 kg, they feature cycle times starting at 0.38 sec.

G-Series

With more than 300 models available, high-performance G-Series robots are ideal for applications where fast cycle times and high precision are required. The Epson lineup offers reach distances ranging from 175 to 1,000 mm, and payloads from 1 kg to 20 kg, plus cycle times starting at 0.29 sec.

VT-Series

Offering next-level technology at an incredible price, VT-Series All-in-One 6-Axis robots ensure easy setup with a built-in controller. With a reach of 900 mm and payloads up to 6 kg, these robots are ideal for simple applications such as machine load/unload, packaging, assembly and more.

C4-Series

C4 robots offer excellent performance for the most demanding and complex tasks. Compact, yet powerful, they deliver high repeatability and fast cycle times with reach distances ranging from 600 to 900 mm and payloads up to 4 kg.

N-Series

Setting a new standard for 6-Axis robots, the N-Series includes a revolutionary folding-arm design for maximum motion efficiency. N-Series robots offer reach distances of 450 to 1,000 mm and payloads of 2.5 and 6 kg.

C8 / C12 -Series

C8 and C12 robots are ideal for demanding applications requiring 6-Axis dexterity. With both long reach and heavy payloads, they provide remarkable flexibility. In fact, these compact robots offer reach distances ranging from 700 to 1,400 mm and payloads up to 12 kg.

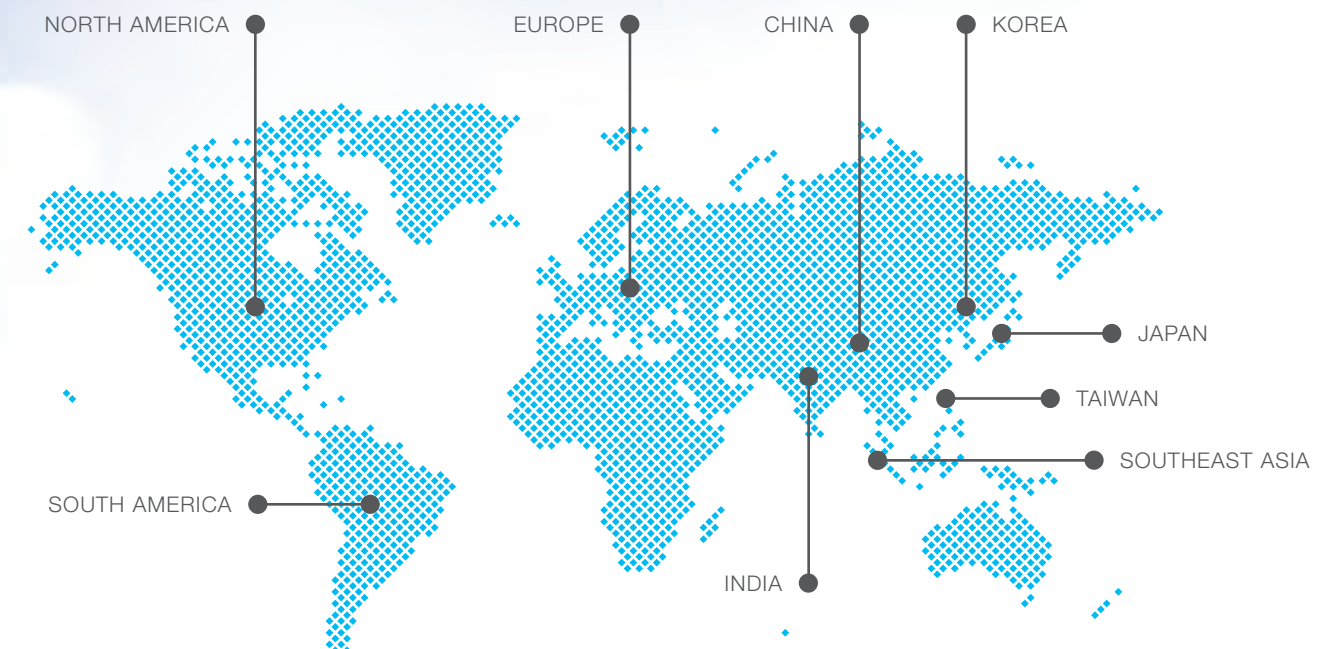

Industry Solutions

Epson Robots is a leading supplier to a wide variety of manufacturing industries including automotive, medical, electronics, consumer products, industrial and many more. Our customers range from large Fortune 100 companies to small manufacturing facilities.

- **Automotive:** Brakes, clutch components, ignition systems, instrument panels, headlights, mirrors, locks, sensors and more
- **Medical:** Contact lenses, glasses, dental instruments, dental implants, hearing aids, pacemakers, blood test systems and much more
- **Electronics:** Chip handling and placement, encoder assembly, board and laser diode testing, wire bonding and more
- **Consumer products:** Smartphones, tablets, speakers, jewelry, watches, cosmetics, printers and more

Global High-quality Support, When and Where It's Needed

At Epson, our reputation is built on the high quality of our products and services, and maintaining that quality is a worldwide priority. Our support network for robotic products includes nine regional centers, and we stand ready to meet the needs of customers in virtually every major market.

Applications

Epson robots are extremely versatile and provide a wide range of automation possibilities:

- | | | |
|------------------------|-------------------|--------------------------|
| • Assembly | • Machine tending | • Inspection and testing |
| • Pick and place | • Screw driving | • Finishing |
| • Material handling | • Dispensing | • Grinding |
| • Packaging | • Palletizing | |
| • Kitting/Tray loading | • Lab automation | |

Why Epson SCARA Robots?

Epson's lineup of over 300 models gives users the power to choose the right robot for their application. It's just part of what makes us the #1 SCARA robot manufacturer in the world.

Hundreds of models available

- Sizes ranging from 175 to 1,000 mm in reach
- Payloads up to 20 kg
- Tabletop, wall and ceiling-mount options

Fast speeds

- Extraordinary cycle times to maximize parts per hour

Extreme precision

- Repeatability down to 5 microns

SCARA

T-Series All-in-One

T-Series All-in-One SCARA robots are the perfect alternative to complex slide-based solutions. These space-saving robots install in minutes. And, they include the same intuitive software and powerful features found in Epson's high-end robots.

LSB-Series

LSB-Series SCARA robots offer the high performance and great reliability that users have come to expect from Epson, but at a lower cost. LSB-Series SCARAs were created for factories looking for maximum value without giving up performance.

RS-Series

RS-Series robots are some of the most unique and flexible SCARA robots available in the market today. With the ability to cross back under, as well as reach behind themselves, RS-Series robots are able to utilize the entire workspace underneath the arm. As a result, there is no lost space in the center of the work envelope.

G-Series

G-Series SCARA robots feature a high-rigidity arm design that delivers high speed, high precision and low vibration. G-Series SCARA robots offer a wide variety of sizes from 175 to 1,000 mm in reach, with up to 20 kg payloads.

Epson is the #1 SCARA robot manufacturer in the world

T-Series All-in-One

The ultimate slide alternative

Epson T-Series All-in-One SCARA robots make automating your factory fast, easy and affordable. With features such as a built-in controller and an encoder with no battery required, they offer easy integration and take less time to install than most automation solutions.

¹ Cycle time based on round-trip arch motion (300 mm horizontal, 25 mm vertical) with 1 kg payload (path coordinates optimized for maximum speed).
² When payload center of gravity is aligned with Joint #4; if not aligned with Joint #4, set parameters using the INERTIA command.

¹ Cycle time based on round-trip arch motion (300 mm horizontal, 25 mm vertical) with 2 kg payload (path coordinates optimized for maximum speed).
² When payload center of gravity is aligned with Joint #4; if not aligned with Joint #4, set parameters using the INERTIA command.

LSB-Series

These fast, compact, low-cost solutions are ideal for factories looking for maximum value, without sacrificing performance. With payloads ranging from 3 kg to 20 kg and cycle times starting at 0.38 seconds, LSB-Series SCARA robots offer a variety of opportunities for manufacturers searching for a reduced-cost, high performance automation solution with great reliability.

LSB-SERIES

SCARA ROBOTS

LS3-B

Fast, compact and low cost

LS6-B

Great performance at an affordable price

LS10-B

Powerful performance and a large payload at an affordable value

LS20-B

Remarkable value with long reach, high performance and heavy payload

G-Series

With a vast product lineup including reach options from 175 to 1,000 mm, G-Series robots are rich in features and performance. With payloads ranging from 1 kg to 20 kg and cycle times down to 0.29 seconds, G-Series robots offer the speed and overall performance for even the most difficult tasks. Featuring a unique high-rigidity arm design, which reduces vibration, these robots deliver fast speeds and high precision with no overshoot or ringing.

G-SERIES SCARA ROBOTS

G10

Long reach at high speeds

- Arm lengths of 650 and 850 mm
- Reduced residual vibration for faster accel/decel rates
- Tabletop, wall- and ceiling-mount models available
- ISO 3 Cleanroom and IP65 Protected models available

G20

Ultra long reach and heavy payload

- Arm lengths of 850 and 1,000 mm
- Unique design structure for high rigidity
- Tabletop, wall- and ceiling-mount models available
- ISO 3 Cleanroom and IP65 Protected models available

6-AXIS

N-Series

The **N-Series** lineup features a revolutionary compact folding-arm design that maximizes motion efficiency for faster cycle times. Packed with unique technology, the N-Series significantly reduces workspace requirements when compared to typical 6-Axis robots.

Epson's space-saving 6-Axis robots enable a remarkable range of motion to maximize application possibilities.

- Compact wrist pitch enables our robots to access hard-to-reach places in confined spaces

VT-Series All-in-One

With a built-in controller and simplified cabling, VT-Series All-in-One 6-Axis robots offer quick setup and installation. Featuring both 110 and 220 V power connections, they ensure easy integration in labs and industrial environments.

VT-SERIES 6-AXIS ROBOTS

VT6L

A feature-packed performer at a remarkably low cost

¹ Cycle time based on round-trip arch motion (300 mm horizontal, 25 mm vertical) with 1 kg payload (path coordinates optimized for maximum speed).
² If the center of gravity is at the center of each arm. If the center of gravity is not at the center of each arm, set the eccentric quantity using the INERTIA command.

N-Series

The N-Series offers revolutionary technology that provides significant advantages for more efficient workspace utilization than typical 6-Axis robots. Packed with unique technology exclusive to Epson, N-Series robots set a new standard in 6-Axis technology with the world's first folding-arm design.

N-SERIES 6-AXIS ROBOTS

N2

World's first folding-arm design, ideal for assembly and parts handling

N6

Higher payloads and longer reach for load/unload applications

N-SERIES SPECIFICATIONS

		N2	N6
Arm length		450 mm	860 / 1,010 mm

Robot Controllers

Compact and intuitive, Epson controllers make automation configuration easy. Designed for use with both SCARA and 6-Axis robots, Epson's lineup provides advanced servo control for smooth motion and precise positioning. With integrated options available such as Vision Guidance, Force Guidance, Conveyor Tracking and more, Epson controllers provide true solution-based expandability.

CONTROLLERS

All-in-One

Space-saving design with built-in controllers at an ultra low price

RC90B

Great performance at an affordable price

RC700A

Powerful feature set with ultra fast processing

Advanced controllers to meet your automation needs

- **Powerful performance, compact design** — built for space-constrained environments; able to support everything from simple to high-end robots
- **Supports both SCARA and 6-Axis robots** — simplifies the lineup with common platforms
- **Full lineup of both SCARA and 6-Axis controllers** — choose the one best suited for your application
- **Easy to configure/setup** — front access (RC700A and RC90B); intuitive panel; consolidated controls, all on one side, for easy changeouts
- **Advanced servo control system** — enables the robot to quickly perform smooth, precise motions
- **Slots for optional components** — supports a wide variety of fully integrated options

All-in-One

Space-saving design,
ultra low cost

- Supports T-Series SCARA and VT-Series 6-Axis robots
- Comes standard with 110 V and 220 V power
- Use as standalone, PLC slave or with a PC
- Wide variety of integrated options including Vision Guide, IntelliFlex Feeding System, .Net connectivity, Ethernet/IP, DeviceNet, Profibus and more

● SYSTEM CAPABILITIES

RC90B

Great performance
at an affordable price

- Supports LSB-Series SCARA robots
- Use as standalone, PLC slave or with a PC
- Wide variety of integrated options including Vision Guide, Force Guide, IntelliFlex Feeding System, .Net connectivity, Ethernet/IP, DeviceNet, Profibus, Expansion I/O, Conveyor Tracking and more

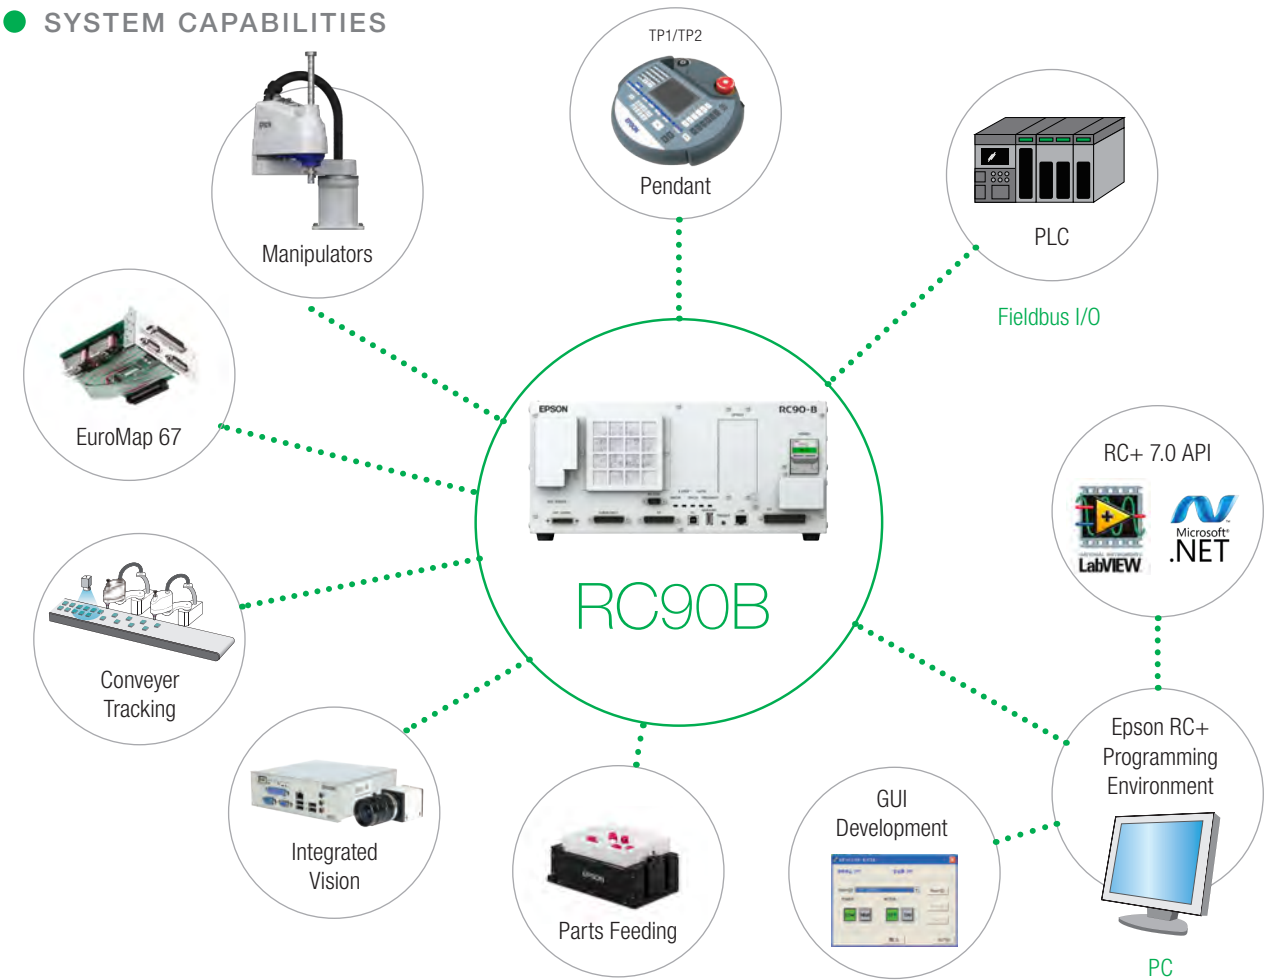

RC700A

Powerful performance
with ultra fast processing

- Supports G and RS-Series SCARA and C and N-Series 6-Axis robots.
- Use as standalone, PLC slave or with a PC, as well as Modules
- Wide variety of integrated options including Vision Guide, Force Guide, IntelliFlex Feeding System, .Net connectivity, Ethernet/IP, DeviceNet, Profibus, Expansion I/O, Conveyor Tracking and more

Epson RC+ Development Software

Epson RC+ Development Software offers the ultimate selection of powerful, ease-of-use features, reducing the time needed to develop automated robot solutions. This advanced software includes fully integrated options such as Vision Guidance, Force Guidance, Conveyor Tracking, Parts Feeding and more. Intuitive by design, Epson RC+ includes many time-saving features such as wizards, templates, smart tools and more — allowing users to get their systems up and running quickly.

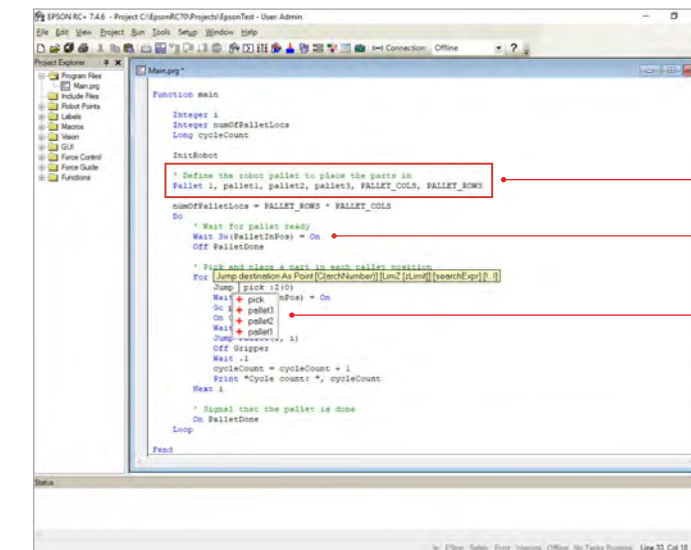

All-inclusive development environment

- Projects
- Robot manager
- Task manager
- Run window
- Operator window
- Jog and teach window
- I/O monitor
- Offline development
- Wizards
- Project explorer
- Toolbar customization
- 3D simulator

EDITOR

Auto-assist makes editing easier than ever

Epson RC+ includes powerful editing capabilities to minimize mistakes and streamline program development. In addition to basics such as cut, copy and paste, it also includes syntax assist, auto-indent, color-based command usage, comment blocks, indent/outdent, find/replace and more.

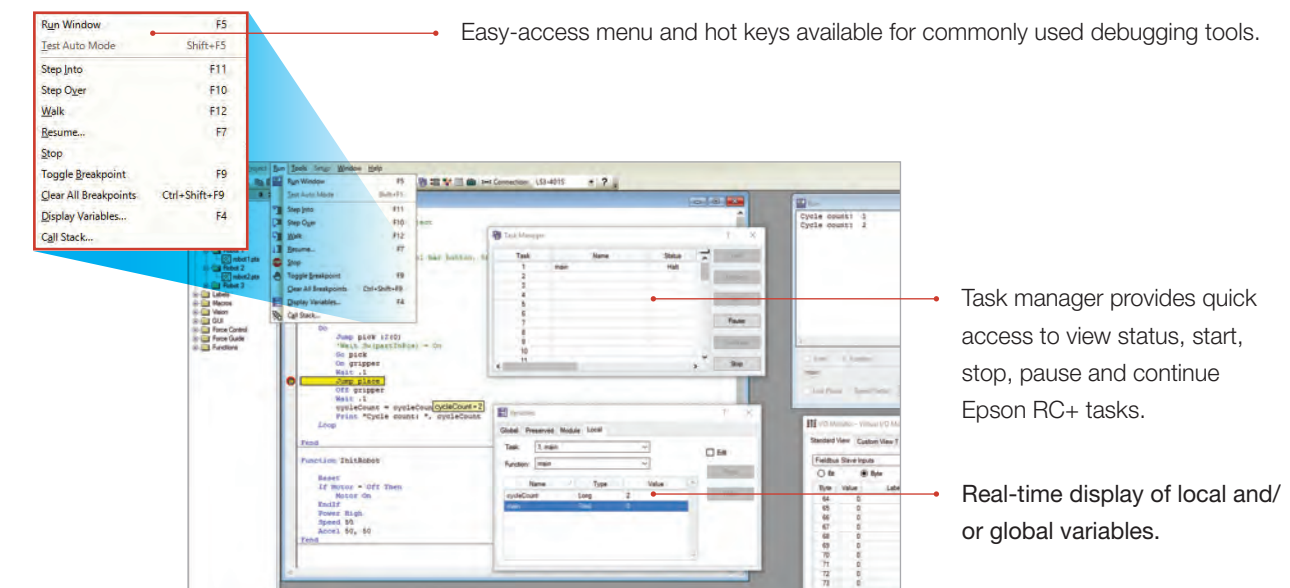

- **Color-based editor** where keywords are blue, parameters in black, comments in green and incorrect syntax in red.
- **Automatic indenting of code** contained in a function block for easy readability.
- **Syntax Assist** helps users type or select the proper syntax for commands and their associated parameters.

INTEGRATED DEBUGGER

Easily identify issues in record time

The integrated debugger offers many clever ways to check the status of your program or identify issues you may find while running it. The Epson debugger allows you to check specified variables, view the value of those variables in real time, set break points, perform a single-step execution, or jump over certain steps. You can also step into a function to view more details.

Easy-access menu and hot keys available for commonly used debugging tools.

Task manager provides quick access to view status, start, stop, pause and continue Epson RC+ tasks.

Real-time display of local and/or global variables.

SOFTWARE

3D SIMULATOR

Build and fine-tune your application before hardware setup

Take automation development to the next level with a virtual test run. Epson's workcell simulator means you can program your workcell, even before your hardware has arrived. See a 3D simulation of your application in action – in real time. You can even add additional components that may be a part of the workcell, such as a table, feeder or various types of guarding. Add a tool to the robot's arm and implement your program to examine the efficiency of the application.

Need to examine how multiple robots might affect productivity? Give it a test run with a detailed, simulated workcell.

Full-featured simulator supports up to three robots and peripherals such as guarding, tools, parts and more.

Cycle-time Calculation

- Calculate cycle time based on real application execution.

Offline Application Checking

- Program can be created and debugged from standalone PCs.
- Debugged programs can be rolled out directly to plant floor workcells.

Machine Vision Simulation

- Machine vision image processing input can also be used within simulations.

Record and Playback Functions

- Recording and playback functions make it easy to include still images and movies in presentations.

Clearance Checking

- Choosing the right robot is easy because you can check all necessary workcell and peripheral equipment.

Vision Guide simulation supported with Epson RC+ 7.0

SPEL+ ROBOT LANGUAGE

Epson's SPEL+ is a powerful yet easy-to-learn-and-use programming language for robot automation applications. With 500+ commands and statements, including motion functions, I/O control, variables and data types, program control and more, SPEL+ can be used for both complex and simple applications.

Example Program

```
Function main
  Motor   On           *turn motor power on
  Power   High         *Power mode set high
  Speed   100          *Speed 100%
  Accel   100, 100     *Acceleration/Deceleration 100%

  If Sw(partok) = On Then *Checking if good part
    Jump   goodparts     *move arm to goodpart pile
  Else
    Jump   badparts      *move arm to bad part pile
  EndIf

Fend
```

INTEGRATED ENVIRONMENT

One source, one comprehensive solution

Epson software offers easy integration of Epson robots with various automation options, including Vision Guide, Force Guide, IntelliFlex Parts Feeding, Conveyor Tracking and more. Built as a comprehensive solution for any given application, it provides seamless integration, allowing all components to interface with one another in a single environment.

Vision Guide and Force Guide are just two of the many integrated options available with Epson RC+.

Integrated Solutions

Enhance your robot automation solution with integrated options such as Vision Guide, Force Guide, IntelliFlex Parts Feeding and more. These powerful solutions make it easy to quickly build various applications without having to worry about peripheral communication setups and development from multiple environments. Instead, you can focus on maximizing the efficiency of your application.

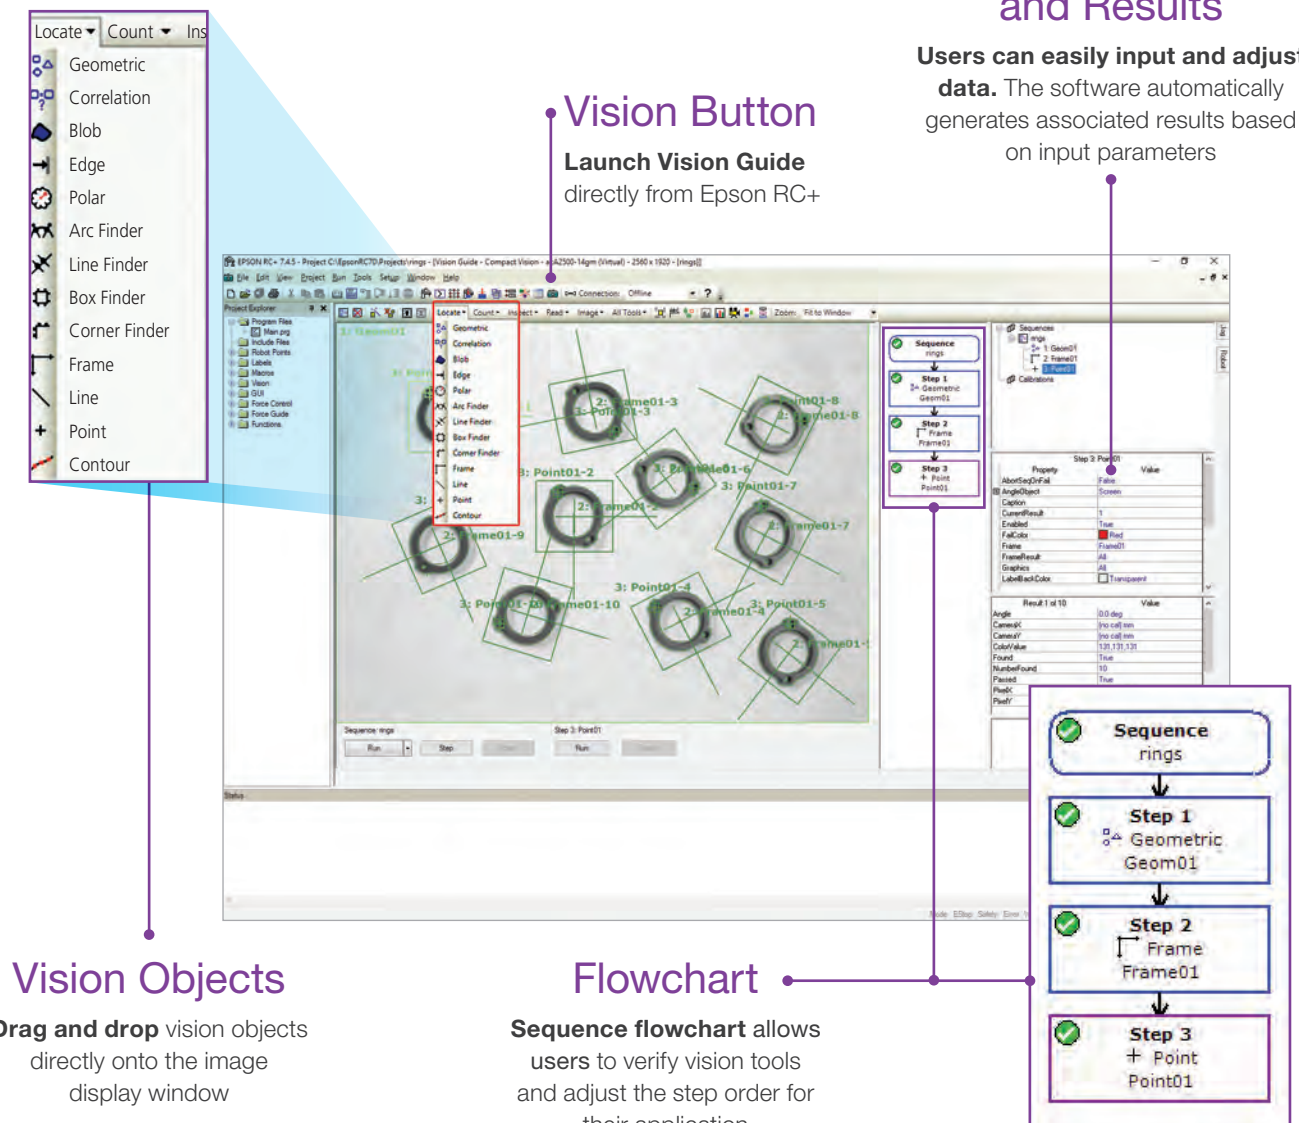

VISION GUIDE

Vision guidance made easy

Epson Vision Guide makes precision robotic guidance easy to use. Fully integrated within the Epson RC+ development environment for easy configuration and calibration, this intuitive solution features a point-and-click interface that makes it simple for users of all levels. It also features wizards and auto calibration methods, plus a combination robot/vision simulator for rapid offline testing. With a common software environment for both robots and vision guidance, Epson Vision Guide allows for fast development and simplified maintenance. An efficient and versatile solution, it also includes tools for inspection, gauging, barcode reading and much more.

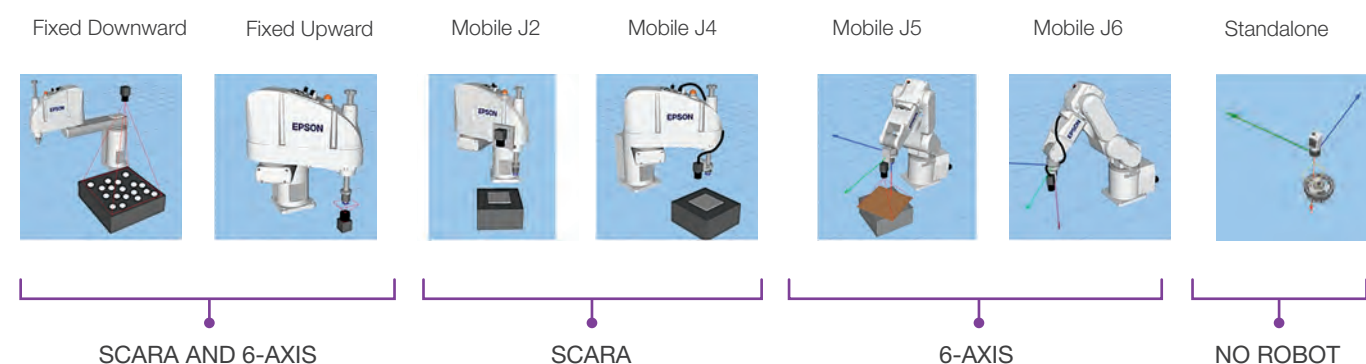

Object Properties and Results

Users can easily input and adjust data. The software automatically generates associated results based on input parameters

True robot geometry-based calibration

Unlike common mapping-based calibration, Epson Vision Guide uses a powerful geometric-based calibration solution to improve the precision of camera-to-robot-coordinate system translation. Reduce calibration time and improve consistency with the integrated calibration wizard and easy step-by-step instructions. Multiple calibrations for both 6-Axis and SCARA robots, including fixed-downward, fixed-upward and those with mobile-joint-mounted cameras, are supported.

Versatile tool set

Geometric Finds a model based on geometric features. Used for determining position and orientation.	Blob Computes geometric, topological and other image features. Used for determining presence/absence, size, positioning and orientation.	Correlation Measures quality compared to previously trained features for alignment, inspection, position and orientation.	Edge Locates edges by identifying changes in grey value from dark to light or light to dark.	ImageOp Performs morphology, convolution, flip, binarize, rotate and more for a region of interest.
Polar Uses correlation of a rotational area to determine object orientation.	OCR Optical Character Recognition is used to recognize character strings in an image.	CodeReader Reads bar or two-dimensional codes, including data matrix and others.	ColorMatch Detects user-defined colors.	LineFinder Determines the location of a line in an image.
LineInspector Identifies deviations on a linear path between two points.	ArcFinder Determines the radius and center point of an arc or major/minor axes and the angle of an ellipse.	ArcInspector Determines abnormalities in the arc of a circle/ellipse.	DefectFinder Compares a template image to an input image to identify defects.	Frame Provides dynamic position reference for other vision objects.
Line Defines a line between two objects.	Point Defines reference positions for other objects.	BoxFinder Determines the center of an object.	CornerFinder Identifies the intersection position of two lines that form a corner.	Contour Generates a contour based on the external shape of an object.

Full-featured, integrated solution

System	CV2SA	CV2HA	PV1
Robot controller	RC700A, RC90, RC90B, T-Series, VT-Series		
Cameras supported (Epson cameras only)	GigE: Mono (0.3 MP, 1.3 MP, 2 MP, 5 MP, 10 MP and 20 MP) and Color (2 MP, 5 MP, 10 MP and 20 MP) USB: Mono (0.3 MP, 1.3 MP and 5 MP) and Color (1.3 MP, 5 MP)		
Vision tools	Locate: Geometric, Correlation, Blob, Edge, Polar, ArcFinder, LineFinder, BoxFinder, CornerFinder, Frame, Line, Point and Contour Count: Blob, Correlation, Geometric Inspect: Blob, DefectFinder, Line, LineInspector, ArcInspector and Color Match Read: CodeReader and OCR Image: ImageOp and Text		
Quantity of connectable cameras	Up to 6 cameras (2 USB and 4 GigE cameras)		Up to 8 GigE cameras
Image processing speed	Standard type	High-speed type	N/A
Safety standard	CE, UL, KC		N/A
Dimensions W x D x H (excluding rubber feet)	232 mm x 175 mm x 70 mm		N/A
Operating temperature and humidity	5~40 deg C, 20~80% (non-condensing)		N/A
Direction of installation	Horizontal or Vertical		N/A
Power source voltage	DC 19 ~ 24 V		N/A
Rated electric current	11.57 A (at 19 V DC) ~ 9.16 A (at 24 V DC)		N/A
Weight	2.1 kg		N/A
Interface (connection)	Ethernet (for communication with Robot Controller)	RJ45: 4 ports (1000Mbps). Power over Ethernet (PoE) supported. Can connect to HUB or Switch.	
	Ethernet (for GigE camera)	RJ45: 4 ports (1000Mbps). Power Over Ethernet (PoE) supported.	
	USB	USB 2.0: 4 ports (for USB Camera, USB Memory, Mouse, Keyboard)	
	Monitor connection	VGA: 1 port, DVI-D: 1 port (SXGA fixed) The 2 ports display the same output (mirror display)	
	CON1, CON2	Not available	
CV2 standard accessories	Mounting plates (1 set), Power supply connector (1 pc), Connector cap for CON (2 pcs)		N/A

The smarter parts singulation solution

Powered by Epson robots, IntelliFlex Software, and Vision Guide, the IntelliFlex Feeding System delivers a simplistic feeding solution to accommodate a wide variety of parts. Integrated with Epson RC+ Development Software, the IntelliFlex Feeding System offers easy setup and configuration. Its point-and-click interface helps reduce the typical development time required for advanced applications. With two feeder sizes available (the IntelliFlex 240 and 530), the system can accommodate part sizes ranging from 5 to 150 mm. The IntelliFlex system also offers intelligent auto-tuning for fast setup and flexible parts changeover. And, multi-axis vibration technology provides optimized parts control and singulation.

IntelliFlex 240 – Ideal for part size, 5 – 40 mm

Point-and-click setup and configuration

Fully integrated with the Epson RC+ Development Software, the IntelliFlex Feeding System makes setup and configuration easier than ever. Its point-and-click interface helps reduce the typical development time required for advanced applications, often taking it from weeks down to days.

EPSON SYSTEM SETUP

- 1. Vision Programming**
 - Built-in robot-to-vision calibration and point-and-click programming
- 2. Parts Tuning**
 - Automatic parts tuning with vision feeder integration
- 3. Parts Control Adjustment**
 - Configuration wizard for defining part separation pickup area and more

TYPICAL SYSTEM SETUP

- 1. Feeder Communications**
 - Low-level protocol using feeder command set
- 2. Feeder Tuning**
 - Getting parts to move properly
- 3. Vision Setup and Calibration**
 - Calibrating vision system to robot
- 4. Vision Programming**
 - Finding parts reliably
- 5. System Programming**
 - Robot + Feeder + Vision coordination
- 6. Optimization**
 - Fine-tuning and performance optimization

Turn this ...

Into this ...

With this.

With multi-axis vibration technology, designed to optimize parts control

Precision parts calibration with smart auto-tuning

Epson RC+ Development Software also features an intuitive wizard to guide users through customized calibration. Step by step, this wizard automatically determines the exact values needed for optimum tuning and calibration.

Part pickup regions maximize parts throughput

Easily set parameters specific to each part, no coding required

Configures feeder orientation to properly select the pickup area without needing to modify the physical application layout

Defines parts pickup area to optimize cycle time

Parts calibration (tuning) wizard reduces tuning time

3 simple steps to set up calibration parameters

Integrated image display window to show part separation results

Automatically computes and displays the tuning parameters – vibration amplitude and vibration time

IntelliFlex Feeding System

Intuitive robot force guidance for high-precision performance

Powered by proprietary Epson Quartz Technology, Epson Force Guide enables Epson robots to detect six axes of force with precision down to 0.1 N. Driven by real-time servo system integration, Force Guide delivers fast, tactile feedback to guide robots for high-precision parts placement. Easy to set up, Force Guide features a point-and-click interface with pre-configured solutions and built-in objects, reducing the development time for precision applications.

Advantage Epson

Drawing on our global expertise in robotic solutions, Epson created Force Guide as a tool to achieve higher productivity in automated manufacturing processes. Epson Force Guide features proprietary Quartz Technology which provides remarkable rigidity and powerful performance, allowing customers to complete automation tasks that were previously not possible.

- **Epson Quartz Technology**
- **High rigidity**
- **Powerful performance**

Force Guide applications

Force and torque sensors are an increasingly significant component for material testing, assembly, development, and quality assurance. Because of their accuracy, versatility and reliability, they are being used by more and more companies around the world. Epson Force Guide provides a wide range of automation possibilities:

Parts and connector insertion

With Epson Force Guide, parts and connector insertion can be easily automated, for everything from pin-in-socket insertion to high-precision valve assembly. Epson sensors detect misalignment. And, because of high sensitivity, the part or connector is easily inserted, damage free.

Screw driving

Thanks to real-time force/torque feedback, the smallest of screws can be easily tightened, even when there is deviation in angle or location. By detecting the force, the robot can successfully execute the task, while preventing any stripping of the threads.

Delicate parts handling

Because of its tight integration with the servo system, Epson Force Guide makes it easy to handle glass and other delicate materials. Our quartz-based sensors allow for soft placement in applications that would otherwise result in breakage of glass or other fragile materials.

Grinding/polishing

Deburring and grinding of parts to accurately remove excess flash is possible with Epson Force Guide, despite deviations in casting or dimensions. The tool remains on its path, due to real-time force feedback. Similarly, polishing can be automated so as to keep the tool pressing with constant and precise force to the part.

Gear meshing

On assembly operations, Epson Force Guide provides the robot with the tools and data necessary to align and match the faces of various components, including multiple gears.

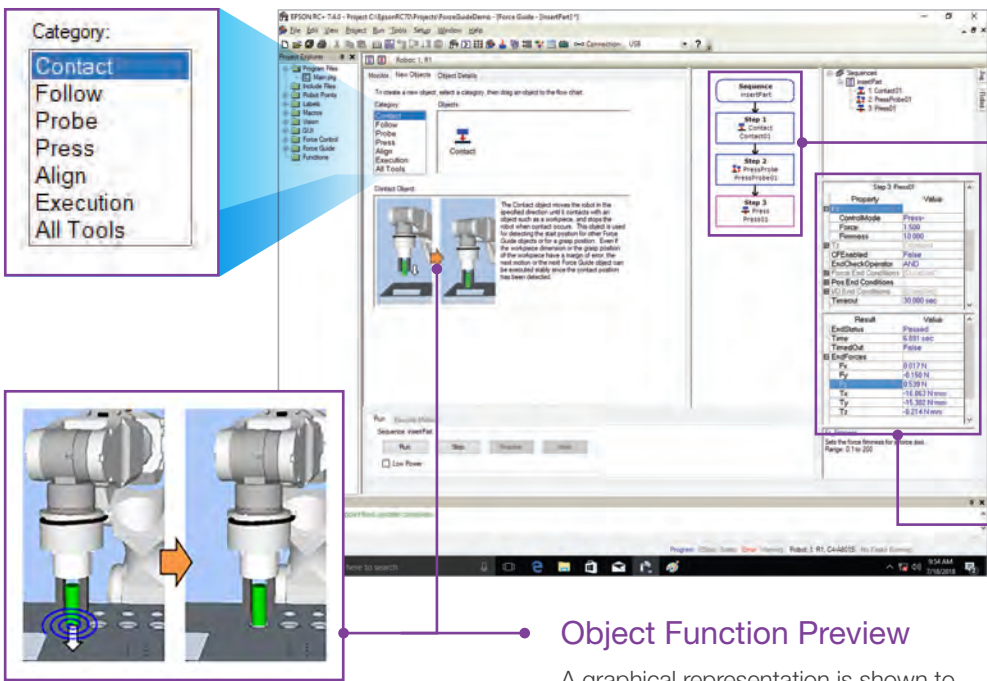

Force Guide tools

Pre-configured force guidance object tools provide a simple method for creating robot force-based motions and applications.

Intuitive interface

Fully integrated in the Epson RC+ development environment, Epson Force Guide applications can be created and tested in an easy-to-use point-and-click fashion.

Force Guide Sequence

The Force Guide sequence flowchart provides a simple drag-and-drop mechanism for defining the force guidance operational flow (ordering of steps). This reduces the amount of programming required for Force Guide applications.

Object Properties and Results

Users can input and adjust force and torque data. The software automatically generates associated results based on input parameters.

Object Function Preview

A graphical representation is shown to illustrate the robot motions associated with specific Force Guide tools.

Real-time Force Guide monitoring

Epson Force Guide provides real-time graphical representations of both force and torque, allowing users to see and adjust force guidance based on object parameters. Epson Force Guide also provides visual feedback and records and displays data logs to ensure operational reliability.

GUI Builder

COMPATIBLE CONTROLLERS

RC700A RC90B All-In-One

Easily create a Graphical User Interface for operators

- Fully integrated within Epson RC+ to reduce overall development time
- Create GUIs without Visual Studio or other third-party software tools
- Create and debug GUI forms from your Epson RC+ Project
- Form and Control Events are executed as SPEL+ tasks
- Perfect for novices and experts alike
- Works with RC700A, RC90B and All-in-One controllers

Steps to use GUI Builder

STEP 1

Create a new form and click the Button control from the GUI Builder toolbar and drag it to the form.

STEP 2

Double-click the button and the Code Editor will appear. Add the SPEL+ code you want to execute when the button is clicked from your application.

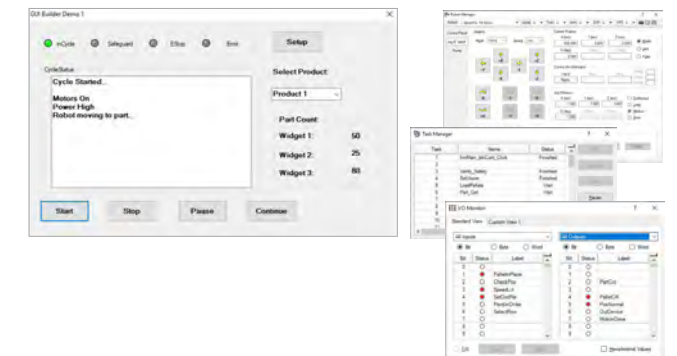

STEP 3

Add more graphic components on your form and associated SPEL+ codes as required for your application.

STEP 4

Run the application from the Epson RC+ Run window or set it up to have the GUI come up automatically. You can also bring up RC+ dialogs like the I/O monitor shown here.

The GUI Builder Window

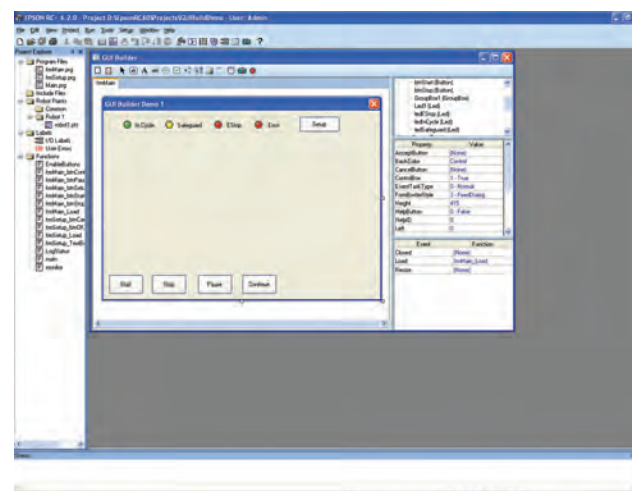

GUI Builder has 5 main areas of use for creating and modifying user GUIs. These include: Toolbar Buttons, Design Area, Forms Explorer, Property Grid and Events Grid.

GUI Builder area definitions

● DESIGN AREA

Where forms are displayed at design time.

Each opened form is displayed on its own tab. You can easily switch between forms by clicking on the tab or double-clicking the form in the Forms Explorer.

● TOOLBAR BUTTONS

Contains the various controls to be put on a GUI Builder form. Many of the common controls are supported such as Button, Label, Textbox, Radio Button, Checkbox, etc. However, there are also some controls unique to Epson that help reduce development time for items routinely needed for robot systems. Some of these unique controls include the Video Box Control (to display the Vision Guide Image) and the LED control (to interface with the Epson Robot I/O).

● FORMS EXPLORER

A tree that contains each form for the current project and its associated controls. When a new form or control is created, it is added to the tree. Double-clicking on a form opens the form in its own tab in the design area.

● PROPERTY GRID

Used to display and edit forms and control properties. When you select a form or control, the associated properties are displayed in the grid. You can edit the values for properties, thus changing the characteristics of the specific control.

● EVENTS GRID

Used to display and change events for the associated form or control. Each event has a user function (written in SPEL+ code) that is called when the event occurs. This gives the user complete flexibility to program what happens when specific events occur.

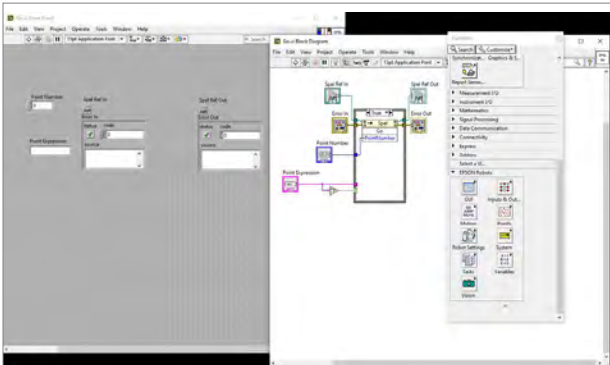

RC+ 7.0 API

COMPATIBLE CONTROLLERS

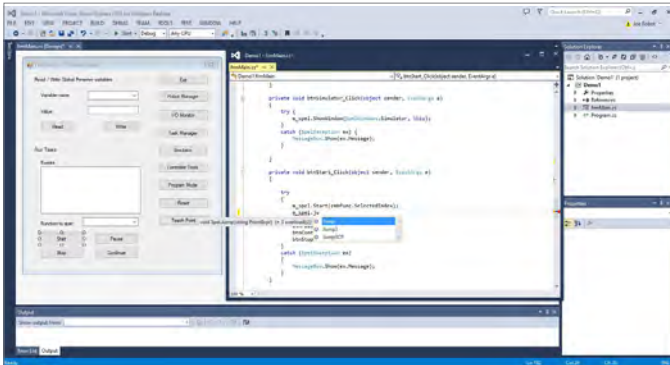

- RC700A
- RC90B
- All-In-One

Program and execute robot applications in a familiar MS Windows OS environment

- Robots can be controlled using Visual Basic®, Visual C++®, Visual C#®, LabVIEW™, and other third-party programming languages
- Robot status and variable values can be captured
- Vision Guide integration for easy image display on user GUIs
- Third-party .NET interface and database design tools can also be used for program development
- The following Epson RC+ windows and dialogs can be called from within a .NET application:
 - Robot Manager
 - I/O Monitor
 - Task Manager
 - Maintenance Dialog
 - Simulator
 - Force Monitor

LabVIEW

Visual C®

Conveyor Tracking

COMPATIBLE CONTROLLERS

- RC700A
- RC90B

Precision tracking for high-productivity pick-and-place operation

- Supports vision- or sensor-based conveyor tracking
- Vision Guide software detects moving parts for pick-and-place handling
- Multi-conveyor, multi-tool setups are supported
- Automate manual kitting/packaging tasks and help maintain productivity with continuous conveyor operation; ideal for product assembly

Fieldbus I/O (Master)

COMPATIBLE CONTROLLERS

- RC700A
- RC90B
- All-In-One

Bidirectional high-speed peripheral connectivity

- Support for DeviceNet®, PROFIBUS®, and Ethernet/IP® networked peripherals (1,024-point I/O)

Fieldbus I/O (Slave)

COMPATIBLE CONTROLLERS

- RC700A
- RC90B
- All-In-One

High-speed peripheral connectivity

- Support for DeviceNet, PROFIBUS, CC-Link®, Ethernet/IP, EtherCat and PROFINET® networked peripherals (256-point I/O)

Teach Pendant TP2

COMPATIBLE CONTROLLERS

- RC700A
- RC90B
- All-In-One

Easy-to-use pendant

- Universal design ensures ease of use for both right-handed and left-handed operators

Teach Pendant TP3

COMPATIBLE CONTROLLERS

- RC700A
- All-In-One

Powerful pendant for both teaching and robot operation

- 10" color touchscreen panel
- 1280 x 800 high-definition screen resolution
- User-friendly GUI
- Ability to make robot parameter changes
- High-speed test mode
- IP65-rated enclosure is sealed against oil and dust for reliable operation in adverse conditions
- Shock-resistant construction helps protect unit from impact damage
- Universal design ensures ease of use for both right-handed and left-handed operators

Camera Mounting Bracket

Easily mount cameras to robot arm

COMPATIBLE ROBOT MANIPULATORS

G3	G6	G10	G20	LS3B	LS6B
LS10B	LS20B	RS3	RS4	T3	T6
N2	N6	C4	C8	C12	VT6L

Bracket design varies according to robot; please specify model when ordering.

OCR

Optical Character Recognition (OCR) of text on parts and labels

COMPATIBLE CONTROLLERS

RC700A	RC90B	All-In-One
--------	-------	------------

- For use with optional Vision Guide system
- Enables you to specify the font, font size, and number of characters of text that you want to read from an image
- A font creation function lets you create SEMI fonts and user-defined fonts from imaged characters or ASCII conversion files

PG Motion System

Control peripheral devices for fully integrated process automation*

COMPATIBLE CONTROLLERS

RC700A	RC90B
--------	-------

- Epson RC+ Software and pulse generator (PG) cards enable control of multiple third-party drives and motors
- PG robots and standard Epson RC+ system robots can be operated simultaneously, and controlled using the same commands
- PG cards can be used to control X/Y tables, slides, rotary tables, and a wide range of other production/inspection line peripherals
- Each PG card has 4 channels, and can support from 1 to 4 robots; up to 4 cards can be installed on the RC700A

*Drivers and motors for third-party devices not included

ECP

External Control Point (ECP) operation for precise positioning

- For processes requiring the workpiece to be moved against a fixed tool, external control points can be used to ensure precise positioning
- Up to 16 external control points can be set

RC700A DU Drive Unit

Control multiple robots with a single RC700A controller

COMPATIBLE ROBOT MANIPULATORS

G1	G3	G6	G10	G20	RS3
RS4	N6	C4	C8		

Emergency Stop Switch

Helps prevent injuries and damage

- Immediately stops robot operation in emergency situations
- Included with all robots

COMPATIBLE CONTROLLERS

RC700A	RC90B	All-In-One
--------	-------	------------

I/O Cable Kit

Cables and connectors for easy connectivity with no soldering required

- A wide range of I/O cables and connectors are available

COMPATIBLE CONTROLLERS

RC700A	RC90B
--------	-------

RS-232C Cards

Expanded Serial port connectivity

- 2-Port RS232C cards to connect to Serial interface devices

COMPATIBLE CONTROLLERS

RC700A	RC90B
--------	-------

I/O Expansion Cards

Expanded input/output flexibility

- 24 inputs/16 outputs per board

COMPATIBLE CONTROLLERS

RC700A	RC90B
--------	-------

External Wiring Units

Simplifies wiring when mounting end-effector options

- Enables easy, on-site connection of external wiring by users
- Ideal for connecting Vision Guide system camera cables or other wiring

COMPATIBLE ROBOT MANIPULATORS

G6	G10	G20	VT6L
----	-----	-----	------

Tool Adapters/
ISO Flanges

Enhances handling/processing versatility and simplifies end-effector changes

COMPATIBLE ROBOT MANIPULATORS

G1	G3	G6	G10	G20	LS3B
LS6B	LS10B	LS20B	RS3	RS4	T3
T6	N2	N6	C4L	C8	C8L
C8XL	C12XL	VT6L			

Brake Release Units

Release brakes so robot arm can be moved by hand when power is off

COMPATIBLE ROBOT MANIPULATORS

N2	N6	C4	C8	C12
----	----	----	----	-----

Euromap 67 Interface

Epson solution complies with Euromap 67, the standard for connection between injection molding and robots

COMPATIBLE ROBOT MANIPULATORS

G1	G3	G6	G10	G20	LS3B
LS6B	LS10B	LS20B	RS3	RS4	N2
N6	C4	C4L	C8	C8L	C8XL
C12XL					

Training

Epson offers programming, maintenance and robotics Vision Guide classes. You can find class availability, locations and registration information at epson.com/robottraining
