The availability of the product varies according to the country.

- ¹ Page yield based on the ISO / IEC 24712 standard with text and color graphics, using Epson's own methodology. The yield in black is about 4,500 pages based on 1 bottle of black replacement ink and color yield is approximately 7,500 pages based on replacement cyan, magenta and yellow ink bottles. Part of the ink of the included bottles is used for the initialization of the printer, therefore its yield will be approximately 15% lower than that of the replacement ink bottles. For more information, visit www.latin.epson.com
- ² Maximum pages per minute (PPM) are measured after the first page and are based on text patterns, in draft mode, with common paper. The printing time varies, depending on the configuration of the system, the software used and the complexity of the page. The normal ISO ppm print speed in black and color is measured in the default mode, in printing on one side, according to the ISO ppm international standard, ISO / IEC 24734 standard. For more information go to www.latin.epson.com/speed
- ³ The standard warranty is 0 to 3 months with no page limit and from 4 to 12 months or 15,000 pages (whichever comes first). To get 12 additional months (total of 24 months warranty) or up to 30,000 pages (whichever occurs first), register your product and use Epson original ink bottles.
