## New Orient Classic and Simple Style Models Combine Classic Design with Fresh Dial Colours

---

Orient has introduced four new models to its popular Classic and Simple style series in the Classic Collection. Incorporating stylish colours to the classic and simple three-hand dial, coupled with straps that are ideal for casual settings, these attractive mechanical watches are perfect for any occasion.

# ORIENT

One of Orient's best sellers, the Classic and Simple style series is popular around the world, representing everything that is Orient. The series is known for its traditional classical face, a domed glass with a retro feel, and delicate case design with slender lugs.

The new models' dials come in light green, navy, sky blue and bronze colours that lend a fashionable impression to the Classic and Simple style. The yellow or pink gold-coloured hands and indices, which are coordinated to match the eye-catching fresh dial colours, further emphasise the impression of the watch face. The new colours add an endearing quality, making the Classic and Simple style highly attractive to younger generations who are looking for mechanical watches with both elegance and a casual feel.

In addition to the dial colours, the straps are also a distinctive feature of the new models. The stylish straps are colour co-ordinated with the dials: the light green model comes with a camel colour strap that is brown on the sides and back; the navy model comes with a beige strap that is blue on the sides and back; the sky blue model comes with a beige strap that is grey on the sides and back; and the bronze coloured model comes with a strap that is brown on all sides. The elaborate colouring and styling of the dials and straps make this a great model to pair with casual styles for both men and women, and is the ideal accompaniment for any style.

The new Classic and Simple style models are powered by an automatic in-house calibre F6724 (with hand winding) and show the time as well as calendar. The stable accuracy ranging between +25 seconds to -15 seconds per day, coupled with a 40-hour power reserve, make them ideal for everyday use.
