EXCEED YOUR VISION

LOGISTICS

EPSON[®] BUSINESS SOLUTIONS

WHERE THERE'S LOGISTICS THERE'S EPSON

Accurate, Efficient and Cost-effective

Today's logistics and warehouse environments demand greater efficiency, faster turnaround times and more control over processes. From shipping in a timely manner to inventory control, Epson's innovative logistics solutions can significantly improve your operational efficiencies, while reducing overall costs.

Epson has over 40 years of experience helping businesses streamline their supply chain and improve their workflow. By incorporating reliable Epson products into your company's processes, you can maintain a competitive advantage, improve workflow accuracy and reduce efforts and turnaround times.

Improved Productivity

Logistics and warehouse operators need reliable products to keep their business up and running. Epson has a wide range of equipment designed for high-volume industries, plus a support network to help continually refine business processes.

Cost-effective Solutions

Products that offer outstanding value, easy integration, low maintenance costs and solid reliability help warehouses achieve a better bottom line.

Reliability You Can Count On

Partner with Epson and get innovative technology solutions backed by world-class service and support.

Environmental Commitment

With a strong commitment to the environment, we create products that are reliable, recyclable and energy efficient.

1

Streamline your workflow

Scan important documents to speed electronic delivery and distribution, reduce routing errors and facilitate efficient digital storage of critical data.

2

High-performance printers

Quickly print laser-sharp invoices, customs documentation, shipping notices, certificates and other documents at up to 40 percent the cost of color lasers*.

3

Results that make a big impression

Our large-format printers produce photographic-quality prints — on demand. Get eye-catching signage and displays on media up to 44" wide, including posterboard.

4

Collaborative meetings

Our interactive whiteboard solution, BrightLink® Pro, makes it easy for staff, both locally and remotely, to share and edit documents in real time, transforming training sessions and meetings into collaborative events.

5

Innovative solutions

Moverio® smart glasses project a large, semi-transparent image in a worker's field of vision. They can display real-time data, overlay digital instructions when repairing machinery, or record critical steps in a workflow.

6

Custom color label printing — on demand

Enhance your workflow and improve efficiencies by adding photos and color coding to storage and packing labels. These fast, rugged printers produce durable on-demand labels that won't smudge or fade.

7

Labeling made easy

LabelWorks® solutions deliver legible, more consistent facility labels, replacing often hard-to-read, handwritten labels and tags.

8

An industry leader in reliability

Epson robots are the products of choice for applications that require extraordinary precision, fast speed, powerful performance, ease of use and overall value. Transform your warehouse into a more efficient, more reliable operation with innovative robots from Epson.

Why Epson

Successful businesses know that smart investments in technology deliver real results. Epson is a leading provider of technology solutions for document management, collaboration, business transactions and commercial printing. We stand apart from the competition because of our leading-edge technologies that deliver powerful productivity, outstanding results and cost-effective ownership.

Our partners choose Epson because of our commitment to:

- Solutions that deliver performance
- Leading-edge research and development
- Value and world-class service and support
- Sustainable manufacturing practices

Improved Productivity

Reliable robotic solutions — Epson robots are known for running 24/7, 365 days a year. Our robots are used in thousands of factories throughout the world, including many Epson facilities, so we know how important it is to have uninterrupted operations.

Low intervention — WorkForce® Pro printers with the Replaceable Ink Pack System print up to 50,000 pages without having to change the ink².

Convenient collaboration — BrightLink Pro transforms walls, tables and more into interactive displays that combine the benefits of whiteboards, flipcharts and displays into one.

Fast and reliable — Network-ready document scanners make invoicing and document management more efficient.

Cost-effective Solutions

Affordable color printing — WorkForce Pro workgroup printers deliver both significant savings and dramatically reduced energy usage vs. color laser printers³.

Tracking costs — Save big with in-house printing of signage and posters. Track costs with the Accounting Tool on the SureColor® T-Series large-format printer.

Lower storage costs — Scan and store records more efficiently with Epson high-speed workgroup scanners.

Reliability You Can Count On

We understand logistics — Epson partners with you, delivering industry-specific knowledge that helps you keep costs down and customer satisfaction high.

Products designed with logistics in mind — Epson's ongoing investment in new technology delivers robotics, printer and scanner solutions that are hard at work in warehouses around the world.

Ease of use — Epson is a leader in the manufacturing of easy-to-use robots.

Environmental Commitment

Energy savings — The WorkForce Pro WF-R8590 printer requires no warmup time, unlike lasers, and uses up to 70 percent less power than comparable lasers³.

Greater control — Our 3LCD projectors feature an ECO Mode, which reduces lamp wattage, and a scheduling function to turn the projector off, remotely, at a predetermined time.

ENERGY STAR® qualified — Many of our products are ENERGY STAR qualified to help keep costs down and the environmental impact at a minimum.

- 1 Total costs of printing with the ink included with the WF-R8590 printers and replacement ink compared with the costs of printing equivalent ISO pages with the best-selling similarly-featured color laser printers (per IDC June 2015). Toner costs based on manufacturers' ISO yields and online pricing; printer costs based on IDC average selling price. Actual savings will vary based on usage conditions.
- 2 Ink pack yields are estimated based on ISO/IEC 24711 test in Default Mode printing continuously. Ink pack yields vary considerably for reasons including printed images, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colors are used for printing and printer maintenance, and all colors have to be installed for printing. For print quality, part of the ink from the included ink packs is used for printer startup and a variable amount of ink remains in the ink pack after the "replace ink pack" signal. For details, see www.epson.com/cartridgeinfo
- 3 Compared to best-selling color single and multifunction laser printers priced at \$1,999 (USD) or less as of November 2014. Actual power savings will vary by product model and usage.
