ORIENT STAR announces new Modern Skeleton, a sophisticated and refined design for any business environment.

ORIENT STAR adds three new versions of the Modern Skeleton to its Contemporary Collection, blending the mechanical appeal of a skeleton watch with a simple contemporary design. The new elegant watch will appeal to professionals wanting to express their own individual style.

ORIENT STAR

The Modern Skeleton's unique feature is the large window at the 9 o'clock position showing the oscillation of the balance wheel, and the bold open work dial, revealing glimpses of the in-house movement. The hands with brushed and mirror finishing give improved visibility with touches of Luminous Light, while the layered dial gives a sense of depth, enhancing the mechanical watch's presence and style.

Sallaz polishing gives the case design a crisp, bright finish. This commitment to the finest detail extends to the sharp appearance of the lugs with their acute slope. The metal bracelet displays different finishes to compliment its three-dimensional multi-sided links.

The new additions to the Modern Skeleton range all offer the vibrant colours for which ORIENT STAR is so well known. Two of the regular models come with a metal bracelet and one has a smooth leather strap. One bracelet model features a white dial and blue accents adding a fresh embellishment to brighten any business setting. The other has a dual-layer dial with a green and black two-tone finish, giving a sense of depth. The third model combines a sleek leather strap with a bronze coloured case and black dial, for a vintage feel.

Each model is powered by the in-house automatic caliber F6F44, with 50-hour power reserve known for its stable precision and reliability, and is water resistant to 10 bar.

About ORIENT STAR

Established in Japan in 1951, ORIENT STAR originates from a desire to create a mechanical watch that would become a “brightly shining star” in every aspect, from its design and movements to its manufacture and assembly. Drawing on traditional watchmaking skills and the latest in-house integrated design and manufacturing competencies, the brand has continued to create timeless pieces such as the mechanical movements of the 46-F7 series. The delicate details, sophisticated designs and fine intricacies of these high-quality masterpieces attract the attention of watch connoisseurs from all over the world.
