The availability of the product varies according to the country.

1. Page yield based on the ISO / IEC 24712 standard with text and color graphics, using Epson's own methodology. The yield in black is about 4.500 pages based on 1 bottle of black replacement ink and color yield is approximately 7.500 pages based on replacement cyan, magenta and yellow ink bottles. Part of the ink of the included bottles is used for the initialization of the printer, therefore its yield will be approximately 15% lower than that of the replacement ink bottles. For more information, visit www.epson.com

2. Most functions require an Internet connection to the printer, as well as an Internet-enabled device and / or email. Visit www.latin.epson.com/connect for information about the devices and applications supported by Epson Connect.

3. Maximum pages per minute (PPM) are measured after the first page and are based on text patterns, in draft mode, with common paper. The printing time varies, depending on the configuration of the system, the software used and the complexity of the page. The normal ISO ppm print speed in black and color is measured in the default mode, in printing on one side, according to the ISO ppm international standard, ISO / IEC 24734 standard. For more information go to www.latin.epson.com/speed

4. Wi-Fi CERTIFIED™; the level of performance depends on the scope of the router used. Wi-Fi Direct may require printer software.

5. The standard guarantee is 0 to 3 months with no page limit and from 4 to 12 months or 15.000 pages (whichever comes first). To get 12 additional months (total of 24 months warranty) or up to 30.000 pages (whichever occurs first), register your product and use Epson original ink bottles.

6. Estimated about 35 sets of cartridges based on the print yields of the black ink and replacement color bottles in comparison with standard ink capacity cartridges for cartridge printers with similar characteristics from leading manufacturers as of July 2017.6. Estimated about 35 sets of cartridges based on the print yields of the black ink and replacement color bottles in comparison with standard ink capacity cartridges for cartridge printers with similar characteristics from leading manufacturers as of July 2017.

7. The comparison of savings is based on the purchase cost of the replacement ink bottles and the cost of sufficient cartridges to reach the total yield on pages of the bottles, using the prices on the internet of the main manufacturers of multifunctional printers and the yields of the highest capacity cartridges for consumer inkjet printers sold in Latin America and with similar features and prices of $ 150 USD or less, according to syndicated sources of third-party industry data as of July 2016, in the last 12 months.

8. Windows Server OS only supports printing and scanning.

9. Some applications or functions may not be available in Mac OS X.
