ORIENT adds ten new models to its Contemporary Collection. *A refined and simple design to appeal to all ages*

ORIENT announces ten new models in its Contemporary Collection. The additions include four models with clear Arabic numerals and six with simple Roman numerals. Each model has a three-hand time display, a date window, and a wide and highly legible dial. The clean and crisp design makes them ideal for everyday use.

ORIENT

The new Contemporary models all include ORIENT's reliable and accurate in-house manufactured automatic movement, which can be admired through the see-through caseback.

The overall design features a thin bezel, wide dial, and tapered sides to the case, for a slim profile on the wrist. These subtle design features all contribute to a clean, simple and refined appearance. The wearer can adjust the metal strap's short pitch links and buckle to fit comfortably.

The new models have two different specifications. Models with simple Arabic numerals have sapphire crystal, applied Arabic numerals at the 12, 6, and 9 o'clock positions and bar indices, for an elegant finish. The dial has a detailed circumferential pattern where the indices are placed, with stamped stripes in the center giving a sense of depth. Models with simple, slender Roman numerals have crystal glass, with bar indices, and a stylish sunburst pattern on the dial.

The Arabic numeral models are available in black, navy, and white dials with a metal bracelet. The Roman numeral models offer black and ivory dials also with a metal bracelet, navy and white dials with a metal bracelet as well as leather straps.
