EPSON
EXCEED YOUR VISION

BRIGHT, BRILLIANT, BOLD PROJECTION.

Discover a powerful way to impress your audience – the EB-Z series of high brightness business projectors gives you stunning, high-definition images with its 3LCD technology. Its flexible portrait projection capability is the right fit for large-scale venues such as outdoor events and concerts, and you can also project seamless panoramic images over uneven surfaces. With so many fantastic features, there's no better way to shine than with Epson's high brightness business projectors.

ENGINEERED FOR BUSINESS

Deliver Vivid Images

Boasting a first in Epson with impressive high colour brightness up to 11,000 lumens.

Flexible Projection

Damage-free portrait projection capability that's first in its class, along with 360° projection, 7 interchangeable lens, wide range of lens shift.

High Reliability and Durability

Dual lamp relay function that extends the life of the lamps, giving you 24/7 usage with its high range of operating temperature and advanced cooling system.

Epson's EB-Z projector series combines world-renowned 3LCD technology with exceptional versatility to make any presentation shine. With high brightness, ultra-bright projectors deliver crystal-clear and true-to-life image quality in exhibition halls and auditoriums.

Deliver Vivid Images

Astonishing 11,000 Lumens Output

Boasting an astonishing colour light output of up to 11,000 lumens, the EB-Z series marks Epson's brightest projector series yet. With such powerful colour intensity, these ultra-bright projectors deliver dazzling, high-definition projections in lecture halls, large conference rooms and auditoriums, even in bright ambient surroundings.

Super Resolution Technology

Epson's super-resolution technology delivers razor-sharp images even when projecting low-resolution content onto large screens. With image data processed frame by frame, even rapid motion remains crisp.

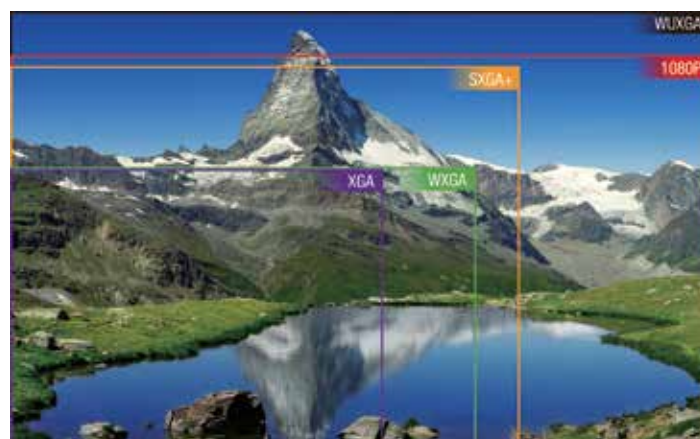

Super-resolution off

Super-resolution on

Incredible WUXGA Resolution Beyond Full HD

Deliver dynamic viewing experiences with superb high-resolution image display without distortion in Full HD video, Blu-ray and other graphic-intensive media. With resolution from XGA to WUXGA, the EB-Z series ensures that your projection images remain razor sharp and vivid, even on larger screens.

ology, dynamic image quality and
ness of up to 11,000 lumens, these
, making them perfect for use in

Frame Interpolation

Enjoy clearer, sharper playback with Epson's Frame Interpolation Technology, which effectively eliminates motion blurring by inserting new frames between original ones to create smoother motion transition.

Colour Adjustment

The colour adjustment function enables adjustment of hue, saturation, and brightness for each component of RGBCMY. Colour can be adjusted to match your preferences.

Vivid Contrast Brings Images to Life

Differences in brightness from image to image can result in loss of detail. Epson's Auto Iris feature changes that by delivering an incredible 15,000:1 contrast ratio, automatically adjusting images for optimal clarity. In combination with C²Fine™, the EB-Z series offers uniform and vivid images with exceptional contrast for a smooth presentation.

Low contrast image

High contrast image

Flexible Projection

Portrait and 360° Projection

The new portrait mode allows you to place your projector on its side with no impact to its performance, enabling you to project your images vertically without compromising on image quality. This makes it ideal for the projection of advertisements and digital signage.

And with 360° projection, you can project images from any angle, so there's no limitation, whatever the space restrictions.

Extensive Lens Options

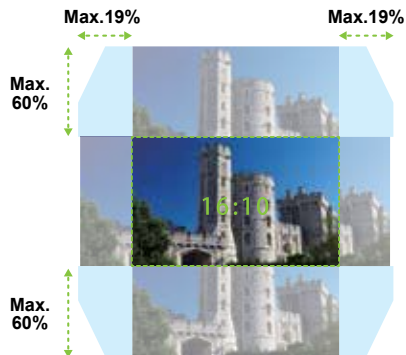

Epson's EB-Z projector series offers seven optional lenses including the standard lens and a new short throw zoom lens, enabling you to zoom in and project images even within short distances and suit every space.

Wide Lens Shift*

Enjoy the ease and versatility of projector and screen placement with Epson's extended maximum vertical lens shift of 60% and maximum horizontal lens shift of 19%.

* Lens shift varies in different models and is not applicable for rear projection lens.

Point Correction

Correct single-projector distortion or multiple-projector misalignment directly on the screen. With this feature, images can be quickly fine-tuned by adjusting point by point from right to left, top to bottom, using a projected maximum 9x9 matrix.

Wide Curved and Corner Surfaces Projection

Fit your projection images nicely even on non-flat surfaces. Now you can create stunning projection images on wide curved surfaces and corner walls, which is ideal for advertisements and marketing promotions.

Split Screen

Split screen allows inputs from two separate sources to be displayed side by side on the same screen for a more effective presentation. In video conferences, images of presentation materials and remote participants can be shown simultaneously.

3D Stacking

Create high-brightness 3D images on screen with the optional 3D polarising plate kit by stacking two of the same models in the Epson EB-Z series.

High Reliability and Durability

Lamp Relay

Fitted with dual lamps and a lamp select and relay function, you'll be able to switch between lamps to save on lamp-hour usage and extend the life of your projector lamps for long-lasting, high-quality performance.

Dust-proof Engine

The optical engine has a high level of sealing performance. Dust-caused image quality degradation is reduced with a design that makes it difficult for dust and other particles to penetrate.

Hybrid Cooling Systems*

The EB-Z projector series is fitted with Epson's original liquid cooling system and air cooling for greater reliability. With this proprietary hybrid cooling system, these projectors can withstand high operating temperatures while preserving brightness and picture quality, even with 24/7 usage. This enables reliable operation in a wide variety of environments at ambient temperatures of up to 50°C.

* Applicable for EB-Z10000U/Z11000/EB-Z9870/Z11000W/Z9900W only.

Durable Body

The body has been greatly strengthened with the placement of a metal base plate on the bottom surface, and the integration of a reinforcing plate on the top surface.

Wide Range of Connectivity

Rich Interface

Epson's EB-Z projector series is compatible with a wide range of external devices and interfaces, and additional ports now include HDBaseT, DVI-D and SDI. Ideal for large venues, HDBaseT can transmit full HD Video, Audio and Ethernet at low cost through Cat 5e/6 cable up to 100 metres.

Web Control

By connecting the projector to a network, it is possible to adjust the projector installation entries from a PC or tablet.

Multi-PC Projection

With the control of a host PC, up to 50 terminals can be connected via the multi-PC projection from a single projector. The host PC acts as a moderator, selecting media from up to 4 terminals to be projected simultaneously. With the moderator function, you can maintain control and prevent tampering with what's projected on screen.

EasyMP Monitor & Message Broadcasting

With Epson's network monitoring and control software, you can see from a single PC which projectors are available and whether they are running efficiently – even across the biggest network. You can configure your projectors and access their serial numbers remotely, as well as receive instant email alerts for pre-defined critical indicators such as non-functioning devices or overheating lamps.

Now you can send messages or announcements as JPEG files simultaneously to any number of projectors on a network. This makes the projector series very useful for immediate communication needs or even emergencies.

Third-party Systems Integration

Advanced third-party systems integration means convenient and hassle-free projections. With a wide-ranging interface, these projectors not only correspond with conventional analogue systems, they work with and support a range of systems including Extron XTP Protocol, Crestron Room View, AMX Device Discovery and PJLink.

Auto Power On

With the auto power on function, your projector will automatically turn on once the projection signal is detected, providing you with an easy and hassle-free presentation.

Eco Features

- Uses just 0.37W of power in standby mode
- Projector optics employ lead-free lenses
- Unpainted plastic housing reduces the environment impact
- The flame retardants used in the plastic housing do not contain chlorine or bromine

SEE VIBRANT, REALISTIC COLOURS WITH HIGH COLOUR BRIGHTNESS.

A New Specification

Projectors have always had their brightness rated only for white light. However, they may have very different colour brightness levels. The Colour Brightness specification provides a new way for buyers to compare the holistic performance (white and colour light brightness) of projectors to make a more informed decision.

Epson
Colour Brightness 2600 Lumens
White Brightness 2600 Lumens

Competitor
Colour Brightness 750 Lumens
White Brightness 2700 Lumens

What is Colour Brightness?

As the term implies, Colour Brightness is a new international standard that states a projector's colour light output in lumens. It measures the brightness of a projector's red, green and blue light.

These are the measurements to look for:

Colour Brightness - Colour Light Output

White Brightness - White Light Output

Epson

Competitor

* Compared against similarly-priced leading 1-chip DLP® business and education projectors based on NPD data from July 2011 through June 2012 (available from www.npd.com). Colour brightness (colour light output) measured in accordance with IDMS 15.4. Actual colour brightness will vary depending on actual usage conditions. 3LCD® is a registered trademark of Seiko Epson Corporation. DLP® is a registered trademark of Texas Instruments, Inc. and its use here does not imply any affiliation with or endorsement by them.

Why Does Colour Brightness Matter?

Even if a projector has high white brightness, it's Colour Brightness could be as low as 1/3 of its white light brightness specification. With a projector that has high Colour Brightness, you'll see vibrant, realistic colours; but if Colour Brightness is low, colours can look dull and dark, skin tones can be reproduced poorly and important details can be lost.

Epson

Competitor

How to Find a Projector's Colour Brightness?

1. Look for separate Colour Brightness and white brightness specification.
2. Projectors with similar white brightness levels can have vastly different and significantly lower Colour Brightness levels.
3. Many manufacturers may not want you to know their projectors are only 1/3 as bright when measuring colour.

www.epson.co.in/clo

EPSON 3LCD TECHNOLOGY – FOR BRIGHT, FAITHFUL COLOURS

3LCD projectors offer brighter and more accurate colours as they produce different shades and hues by filtering, then mixing beams of the three primary colours (red, green and blue).

In a 3LCD projector, white light is first split into the three beams of primary colours. Each beam is then filtered through its own LCD that will give each individual pixel of the image its exact brightness for each colour. The colour beams are then perfectly recombined in a prism before being projected out as a complete image.

This compares to projectors using single-chip technology that actually project individual colours sequentially by filtering their single white light beam through a colour wheel, and then relying on human colour perception to combine the colours in the viewers' minds.

As a result, 3LCD projectors also offer greater detail, smoother gradations, no "colour breakup" effect, are easier on viewers' eyes, and consume about 25% less power to achieve the same brightness compared to a single-chip projector using a lamp of the same wattage.

3LCD projector : RGB are projected at the same time, which makes the single composite image easy on the eyes.

• An independent test by projector review media ProjectorCentral.com in 2009 of about 800 projectors found that on average, 3LCD projectors use 25% less power than single-chip projectors.
