Orient Star Adds New Dial Colours to its Modern Skeleton Line-up in its 10th Anniversary Year

Orient Star has launched four new Modern Skeleton models. The Modern Skeleton is popular for its cutting-edge, contemporary design that reveals part of the mechanical movement through the dial. The new models pivot away from the stately colour scheme that the Modern Skeleton is known for, towards a more stylish look that colour-coordinates the dial with the bezel and case.

ORIENT STAR

Orient Star's Modern Skeleton has been a bestseller around the world since its launch in 2014. Joining the collection in its 10th year, the new models are characterised by dial colours that complement the bezel and case. Whereas the previous models' blue, green, and brown-coloured dials contrasted with the case to emphasize the watch face, the tones of the new dial colours complement the metallic textures of the case and other parts of the watch. This creates visual harmony between the dial with its bold open work at 9, 2 and 6 o'clock, and the mechanical movement visible underneath. The result is a new aesthetic to the Modern Skeleton's unique design that utilizes the movement to enhance the dial.

Four new dial colours - silver, ivory, champagne, and black - bring a contemporary, stylish look to the Modern Skeleton. The silver-coloured dial visually ties together the stainless steel bezel and case to create a uniform, single-toned look, while the champagne and ivory dials provide a point of contrast to the stainless steel case and bracelet while complementing the yellow gold or pink gold-coloured bezels. The 10th anniversary all-black model, available in a limited edition of 600 pieces, is a first for the Modern Skeleton and lends an even more stylish look to the watch.

Giving a new, light-hearted image to the Modern Skeleton, these new models are mounted with the automatic mechanical in-house calibre F6F44 offering stable accuracy of +25 seconds to -15 seconds per day and a power reserve of 50 hours. The beauty of the watch can be appreciated from both sides, the dial or see-through caseback, making this a truly attractive model for mechanical watch aficionados all over the world.

About Orient Star

Capture your gaze. Reflecting the wondrous beauty of shining stars. Orient Star are superb timepieces, crafted by Japanese artisans since 1951. Orient Star continues to shine and innovate its technology as well as the design of its beautiful timepieces. Traditional skills to achieve intricate craftsmanship, in-house production system to create high-quality mechanical movements, and original designs, are all incorporated for these unique, made-in-Japan watches. Orient Star will continue to deliver these creations in Japan and throughout the world.

A Short History

- 1951 Orient Star is created.
- 1957 Orient Star Dynamic* is launched with hour, minute, and second hands on the central axis of the watch.
- 1971 The 46 series movement is created, combining both practicality and high accuracy. This formed the base movement of the Orient Star and Orient brand for 50 years.
- 1991 Mon Bijou* is launched, a skeleton model of high-quality and aesthetic appeal.
- 1996 The power reserve indicator, now an iconic feature of the brand, is integrated into the design.
- 2017 Orient Watch Co. Ltd. merges with [Seiko Epson Corporation](#), a company with a strong watchmaking heritage and focus on precision engineering. Both organisations share a vision for innovation and high-quality design and craftsmanship creating a strong foundation for the future growth of Orient Star.
- 2017 The Mechanical Moon Phase, a cosmic timekeeper is launched as a symbol of this new collaboration. This marks a new era of watchmaking for Orient Star brand.
- 2021 Orient Star celebrates its 70th anniversary. The Skeleton models are mounted with the latest movement with in-house developed silicon escape wheel for longer power reserve and beauty, incorporating design inspired by the vast universe.
