Professional Imaging

Exceed Your Vision

As one of the world's most respected performance imaging companies, Epson has set the benchmark for print quality. In many ways, the products shown in this line guide represent some of the most advanced forms of imaging ever developed.

This is what defines us. In short, it is the way in which we combine engineering and innovation, performance and everyday reliability.

From printing the most intricate photograph to the most precise architectural drawing, no other company has been so focused on developing imaging technology that inspires people to do amazing things.

Advanced Printhead Technology
MicroPiezo is a unique printing technology, developed by Epson. Its legendary performance, combined with its ability to support virtually any ink chemistry, has forever changed inkjet printer design. As a result, Epson is not driven by the technology, but uses its advanced technology to achieve what was once considered impossible.

Industry-Leading Ink Technology
At Epson, we have dedicated more than 80 chemical engineers to pushing the limits of ink technology, making Epson® inks the standard in commercial printing industries, from signage to photography to textiles. Across the entire printer line, our latest generation of Epson inks provides outstanding print quality for the most demanding printing requirements.

Epson Professional Media
It's a magical moment when a blank sheet of paper is transformed into an extraordinary work of art. Our wide selection of paper surfaces, weights and textures enables creative professionals to express their true vision. Each paper is optimized for use with Epson inks, printers and drivers to ensure the highest quality and consistency. It's just one reason why professionals prefer Epson media.

* All print speeds shown are based upon print engine speed only, in bidirectional mode. Total throughput times depend upon front-end RIP, file size, printer resolution, ink coverage, networking, etc. For details on print speeds in this guide, see the product brochure for the particular printer or go to www.epson.com.

- To help ensure reliable performance and high image quality, each printer in the P-Series, T-Series, S-Series and F-Series is designed for use exclusively with Epson cartridges and inks. The printer will not function with other brands of new or refilled cartridges, or other brands of ink or bulk ink systems.
- For details on the wireless capability of the P400, P600 and P800, see the product brochure for the printer or go to www.epson.com.

Epson Canada Limited 185 Renfrew Drive, Markham, Ontario L3R 6G3

*All print speeds shown are based upon print engine speed only, in bidirectional mode. Total throughput times depend upon front-end RIP, file size, printer resolution, ink coverage, networking, etc.

- 1 Percent coverage of PANTONE PLUS FORMULA GUIDE solid-coated palette based on Epson Proofing Paper White Semimatte printed with the Epson Driver at 2880 x 1440 dpi. PANTONE coverage may vary when printed under other conditions.
- 2 Results based on Epson and Avery internal lamination testing at six hours after printing. Your results may vary based on environmental conditions, media type used, ink density, and other factors. For warranty information, please refer directly to the media and laminate manufacturer websites.
- 3 Print times based upon print engine speed only, starting when ink is applied to the garment and ending when the application of ink to the garment ceases. Computer processing, network transmission, loading and unloading of garments is not included in these times. Actual print times may vary. Testing conducted by Epson America, Inc. as of November 2017.
- 4 ColorWorks inkjet printers with DURABrite pigment ink, used in combination with Neenah Kimdura™ poly media, have been BS5609 certified.
