EcoTank is a registered trademark of Seiko Epson Corporation. Epson ink tank units sold worldwide through July 2021. 1- The maximum number of pages/copies per minute (PPM/CPM) is measured after the first page with test patterns in draft mode (or economy mode, depending on printer/MFP) on plain paper. Actual print/ copy times will vary based on system configuration, software and page complexity. 2- Black and color copy speeds are determined in accordance with the ISO/IEC 24734 standard. Actual print/ copy time may vary based on system configuration software and page complexity. 3- The standard warranty is 3 months with no page limit and 4-12 months, or up to 15,000 pages, whichever comes first. For an additional 12 months (24 months total warranty) or up to 30,000 pages, whichever comes first, register your product within 30 days of purchase and use genuine Epson ink bottles. For more information about the extended warranty program, visit latin.epson.com/warranty. 4- Part of the ink from the bottles included and used for the initial configuration; yields are lower than those of refill ink bottles. The yields of included ink bottles and refill ink bottles based on ISO / IEC 24712 test pages, using Epson methodology. Actual performance may vary considerably, for some reasons including printing images, print settings, temperature and humidity. Performance may be lower when not frequently impressed or when predominantly impressed with just a certain amount of ink. All ink cores are used for printing and printer maintenance, and all colors must be available for printing. For more information, go to latin.epson.com.
